

1.1 Steril Ürünler		1.1 Sterile Products	
1.1.1 Aseptik Hazırlanan Ürünler		1.1.1 Aseptically prepared	
1.1.1.1 Büyük Hacimli Sıvılar	EDQM KODU	1.1.1.1 Large volume liquids	Definition (EDQM' de yer alan tanım)
Çözeltiler		Solutions	
Göziçi yıkama çözeltisi	50073500	Solution for intraocular irrigation	Liquid sterile preparation consisting of a solution intended for irrigation of one or more internal structures of the eye, for example during surgical procedures.
Hemodiyaliz / hemofiltrasyon çözeltisi	50057000	Solution for haemodialysis/haemofiltration	Liquid sterile preparation consisting of a solution intended for use as a solution for haemodialysis or a solution for haemofiltration.
Hemodiyaliz çözeltisi	11404000	Solution for haemodialysis	Liquid preparation consisting of an aqueous solution containing electrolytes with a concentration close to the electrolytic composition of plasma, intended for use in haemodialysis. Glucose may be included.
Hemodiyafiltrasyon çözeltisi	11403000	Solution for haemodiafiltration	Liquid sterile preparation consisting of an aqueous solution containing electrolytes with a concentration close to the electrolytic composition of plasma, intended for parenteral use in haemodiafiltration. Glucose may be included.
Hemofiltrasyon çözeltisi	11402000	Solution for haemofiltration	Liquid sterile preparation consisting of an aqueous solution containing electrolytes with a concentration close to the electrolytic composition of plasma, intended for parenteral use in haemofiltration. Glucose may be included.
İnfüzyonluk çözelti için çözelti	13061000	Solution for solution for infusion	Liquid sterile preparation consisting of a solution intended for use in the preparation of a solution for infusion.
Kan fraksiyonu modifikasyonu çözeltisi	12103000	Solution for blood fraction modification	Liquid sterile preparation consisting of a solution intended for use in extracorporeal modification of a blood fraction that is returned to the patient following modification.
Kanın pıhtılaşmasını önleyen ve koruyan çözelti	12102000	Anticoagulant and preservative solution for blood	Liquid sterile preparation consisting of an aqueous solution to be mixed with extracorporeal blood.
Kardiyopleji çözeltisi	11209500	Solution for cardioplegia	Liquid sterile preparation consisting of an aqueous solution intended for use in inducing cardiac arrest during heart surgery. Some preparations may require mixing with other preparations prior to administration, for example to adjust the pH.
Kardiyopleji/Organ Saklama çözeltisi	13107000	Solution for cardioplegia/organ preservation	Liquid sterile preparation consisting of an aqueous solution of electrolytes typically at a concentration close to the intracellular electrolyte composition, intended for inducing cardiac arrest during heart surgery, and for storage, protection and/or perfusion of mammalian body organs that are in particular destined for transplantation.
Karın zarı içi çözeltisi	12111500	Intraperitoneal solution	Liquid sterile preparation consisting of a solution intended for intraperitoneal use. 'Solution for peritoneal dialysis' is excluded.
Mesane içi çözelti	11502500	Intravesical solution	Liquid preparation consisting of an aqueous solution intended for intravesical use by means of a suitable applicator. 'Bladder irrigation' is excluded.
Mesane yıkama çözeltisi	11502000	Bladder irrigation	Sterile liquid preparation consisting of sterilised water or an aqueous solution intended for irrigation of the urinary bladder.
Mide yıkama çözeltisi	12114000	Stomach irrigation	Liquid sterile preparation consisting of an aqueous solution intended for irrigation of the stomach.
Organ saklama çözeltisi	12112000	Solution for organ preservation	Liquid sterile preparation consisting of an aqueous solution of electrolytes typically at a concentration close to the intracellular electrolyte composition, intended for storage, protection and/or perfusion of mammalian body organs that are in particular destined for transplantation.
İnfüzyonluk çözelti	11210000	Solution for infusion	Liquid sterile preparation consisting of an aqueous solution intended to be introduced, usually in large volumes, usually into the circulating blood stream.
Peritoneal diyaliz çözeltisi	11401000	Solution for peritoneal dialysis	Liquid sterile preparation consisting of an aqueous solution containing electrolytes with a concentration close to the electrolytic composition of plasma and glucose in varying concentrations or other suitable osmotic agents, intended for intraperitoneal use as a dialysis solution.
Yıkama çözeltisi	12113000	Irrigation solution	Liquid sterile preparation consisting of a large-volume aqueous solution intended for irrigation of body cavities, wounds and surfaces, for example during surgical procedures. Irrigation solutions are either solutions of active substance(s), electrolytes or osmotically active substances in water for injections, or they consist of water for injections as such.
Çözücüler		Solvents	
Göz içi yıkama çözeltisi çözücüsü	50074000	Solvent for solution for intraocular irrigation	Liquid sterile preparation consisting of a solvent containing no active substances, intended for use in the preparation of a solution for intraocular irrigation.
İnfüzyonluk çözelti çözücüsü	50076000	Solvent for solution for infusion	Liquid sterile preparation consisting of a solvent containing no active substances, intended for use in the preparation of a solution for infusion.
Parenteral kullanım için çözücü	11216000	Solvent for parenteral use	Liquid sterile preparation consisting of a solvent containing no active substances, intended for use in the preparation of a product for parenteral use.
Konsantreler		Concentrates	
Konsantre infüzyonluk çözelti için konsantre	13001000	Concentrate for concentrate for solution for infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a concentrate for solution for infusion, which in turn is intended to be diluted in the specified liquid to obtain a solution for infusion.
Göziçi yıkama çözeltisi için konsantre	10600500	Concentrate for solution for intraocular irrigation	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a solution for intraocular irrigation.
Hemodiyaliz çözeltisi için konsantre	11405000	Concentrate for solution for haemodialysis	Liquid preparation consisting of an aqueous solution of electrolytes intended to be diluted with water of a suitable quality to obtain a solution for haemodialysis. Glucose may be included.

İnfüzyonluk çözelti için konsantr	11213000	Concentrate for solution for infusion	Liquid sterile preparation consisting of an aqueous solution intended to be diluted in the specified aqueous liquid to obtain a solution for infusion. It may be added to a solution for infusion during the administration.
İnfüzyonluk dispersiyon için konsantr	50009300	Concentrate for dispersion for infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a dispersion for infusion.
İnfüzyonluk emülsiyon için konsantr	50009500	Concentrate for emulsion for infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain an emulsion for infusion.
Karın zarı diyalizi çözültisi için konsantr	50013250	Concentrate for solution for peritoneal dialysis	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a solution for peritoneal dialysis.
Mesane içi çözültisi için konsantr	50009750	Concentrate for intravesical solution	Liquid preparation intended to be diluted in the specified liquid to obtain an intravesical solution.
Dispersiyonlar		Dispersion	
Dispersiyon için infüzyonluk konsantr dispersiyon	13005000	Dispersion for concentrate for dispersion for infusion	Liquid sterile preparation consisting of a dispersion intended for use in the preparation of a concentrate for dispersion for infusion, which in turn is intended to be diluted in the specified liquid to obtain a dispersion for infusion.
İnfüzyonluk dispersiyon	50017500	Dispersion for infusion	Liquid sterile preparation consisting of two or more phases of which at least one is dispersed in the liquid phase, intended to be introduced, usually in large volumes, usually into the circulating blood stream. To be used only when emulsion for infusion is not appropriate. Solid suspension preparations are excluded.
Emülsiyonlar		Emulsions	
İnfüzyonluk emülsiyon	11211000	Emulsion for infusion	Liquid sterile preparation consisting of an oil-in-water emulsion intended to be introduced, usually in large volumes, usually into the circulating blood stream.
Süspansiyonlar		Suspensions	
İmplantasyon süspansiyonu	11303500	Implantation suspension	Liquid sterile preparation consisting of a suspension intended for implantation in the body; the active substance(s) are released over an extended period of time to obtain a local or systemic effect.
1.1.1.2 Liyofilize Ürünler		1.1.1.2 Lyophilisates	
1.1.1.3 Yarı Katılar		1.1.1.3 Semi-solids	
Jel		Gel	
Enjeksiyonluk jel	11204000	Gel for injection	Sterile single-dose preparation consisting of a hydrophilic gel intended for injection into a specific tissue or organ.
Göz jeli	10602000	Eye gel	Semi-solid sterile single-dose or multidose preparation consisting of a gel intended for ocular use. Eye gels may be presented in collapsible tubes fitted with a cannula and having a content of not more than 5 g of the preparation. Eye gels may also be presented in suitably designed single-dose containers. The containers or nozzles of tubes are of a shape that facilitates administration without contamination.
Üretra jeli	11504000	Urethral gel	Semi-solid preparation consisting of a gel intended for urethral use by means of a suitable applicator.
Krem		Cream	
Göz kremi	10601000	Eye cream	Semi-solid sterile single-dose or multidose preparation consisting of a cream intended for ocular use. Eye creams may be presented in collapsible tubes fitted with a cannula and having a content of not more than 5 g of the preparation. Eye creams may also be presented in suitably designed single-dose containers. The containers or nozzles of tubes are of a shape that facilitates administration without contamination.
Köpük		Foam	
Merhem		Ointment	
Göz merhemi	10603000	Eye ointment	Semi-solid sterile single-dose or multidose preparation consisting of an ointment intended for ocular use. Eye ointments may be presented in collapsible tubes fitted with a cannula and having a content of not more than 5 g of the preparation. Eye ointments may also be presented in suitably designed single-dose containers. The containers or nozzles of tubes are of a shape that facilitates administration without contamination.
Kulak / göz merhemi	50019000	Ear/eye ointment	Semi-solid preparation consisting of an ointment intended for auricular or ocular use.
Patlar		Paste	
İmplantasyon patı	13043000	Implantation paste	Semi-solid sterile preparation containing large proportions of solids finely dispersed in the basis, intended to be implanted in the body for release of the active substance(s) over an extended period of time, usually to obtain a systemic effect.
1.1.1.4 Küçük Hacimli Sıvılar		1.1.1.4 Small volume liquids	
Çözültüler		Solutions	
Deri çizik testi çözültisi	10549000	Solution for skin-scratch test	Liquid sterile preparation consisting of a solution containing an allergen product intended for diagnostic use in a skin-scratch test.
Deri prik testi çözültisi	10548000	Solution for skin-prick test	Liquid sterile preparation consisting of a solution containing an allergen product intended for diagnostic use in a skin-prick test.
Doku yapıştırıcısı	12115000	Sealant	Liquid, more or less viscous, sterile preparation intended for use as tissue glue.
Enjeksiyonluk / infüzyonluk çözelti	50060000	Solution for injection/infusion	Liquid sterile single-dose or multidose preparation consisting of a solution intended for administration by injection or infusion.

Enjeksiyonluk çözelti	11201000	Solution for injection	Liquid sterile single-dose or multidose preparation consisting of a solution intended for administration by injection.
Enjeksiyonluk çözelti için çözelti	13033000	Solution for solution for injection	Liquid sterile preparation consisting of a solution intended for use in the preparation of a solution for injection.
Enjeksiyonluk süspansiyon için çözelti	13047000	Solution for suspension for injection	Liquid sterile preparation consisting of a solution intended for use in the preparation of a suspension for injection.
Enjeksiyonluk uzatılmış salımlı çözelti	13076000	Prolonged-release solution for injection	Liquid sterile preparation consisting of a solution intended for administration by injection; the active substance(s) are released over an extended period of time.
Enjeksiyonluk/deri çizme testi için çözelti	13051000	Solution for injection/skin-prick test	Liquid sterile preparation consisting of a solution containing an allergen product intended for diagnostic use in a skin-prick test or as an injection (usually intraepidermal); it may also be licensed for immunotherapy treatment by injection (usually subcutaneous).
Göz damlası, çözelti	10604000	Eye drops, solution	Liquid sterile single-dose or multidose preparation consisting of an aqueous or oily solution intended for ocular use. Multidose preparations are presented in containers that allow successive drops to be administered. The containers contain usually at most 10 mL of the preparation.
Göz içi damlatma çözeltisi	13044000	Intraocular instillation solution	Liquid sterile preparation consisting of a solution intended to be instilled as drops into an internal part of the eye.
Göz losyonu	10610000	Eye lotion	Liquid sterile single-dose or multidose preparation consisting of an aqueous solution intended for washing or bathing the eye.
Gözüğü yıkama çözeltisi	50073500	Solution for intraocular irrigation	Liquid sterile preparation consisting of a solution intended for irrigation of one or more internal structures of the eye, for example during surgical procedures.
İnfüzyonluk çözelti için çözelti	13061000	Solution for solution for infusion	Liquid sterile preparation consisting of a solution intended for use in the preparation of a solution for infusion.
Kan fraksiyonu modifikasyonu çözeltisi	12103000	Solution for blood fraction modification	Liquid sterile preparation consisting of a solution intended for use in extracorporeal modification of a blood fraction that is returned to the patient following modification.
Kanın pıhtılaşmasını önleyen ve koruyan çözelti	12102000	Anticoagulant and preservative solution for blood	Liquid sterile preparation consisting of an aqueous solution to be mixed with extracorporeal blood.
Kardiopleji çözeltisi	11209500	Solution for cardioplegia	Liquid sterile preparation consisting of an aqueous solution intended for use in inducing cardiac arrest during heart surgery. Some preparations may require mixing with other preparations prior to administration, for example to adjust the pH.
Kulak / göz damlası, çözelti	50018000	Ear/eye drops, solution	Liquid sterile preparation consisting of a solution intended for use as ear drops or eye drops.
Kulak/göz/burun damlası, çözelti	50019500	Ear/eye/nasal drops, solution	Liquid sterile preparation consisting of a solution intended for use as ear drops, eye drops or nasal drops.
Mesane içi çözelti	11502500	Intravesical solution	Liquid preparation consisting of an aqueous solution intended for intravesical use by means of a suitable applicator. 'Bladder irrigation' is excluded.
Mesane içi çözeltisi/enjeksiyonluk çözelti	50033400	Intravesical solution/solution for injection	Liquid sterile preparation consisting of a solution intended for intravesical use or for administration by injection.
İnfüzyonluk çözelti	11210000	Solution for infusion	Liquid sterile preparation consisting of an aqueous solution intended to be introduced, usually in large volumes, usually into the circulating blood stream.
Doku yapıştırıcı çözelti	50061500	Solution for sealant	Liquid sterile preparation consisting of a solution intended for the preparation of a sealant.
Yara çözeltisi	13042000	Epilepsial solution	Liquid sterile preparation consisting of a solution intended to be administered onto a lesion.
Çözücüler		Solvents	
Göz damlası hazırlama çözücüsü	10608000	Eye drops, solvent for reconstitution	Liquid preparation consisting of a sterile solvent containing no active substances, intended for reconstitution of a usually freeze-dried powder for eye drops.
Göz içi yıkama çözeltisi çözücüsü	50074000	Solvent for solution for intraocular irrigation	Liquid sterile preparation consisting of a solvent containing no active substances, intended for use in the preparation of a solution for intraocular irrigation.
Göz losyonu hazırlama çözücüsü	10611000	Eye lotion, solvent for reconstitution	Liquid preparation consisting of a sterile solvent containing no active substances, intended for reconstitution of a usually freeze-dried powder for eye lotion.
İnfüzyonluk çözelti çözücüsü	50076000	Solvent for solution for infusion	Liquid sterile preparation consisting of a solvent containing no active substances, intended for use in the preparation of a solution for infusion.
Parenteral kullanım için çözücü	11216000	Solvent for parenteral use	Liquid sterile preparation consisting of a solvent containing no active substances, intended for use in the preparation of a product for parenteral use.
Damlalar		Drops	
Uzatılmış salımlı göz damlası	10609000	Eye drops, prolonged-release	Liquid sterile single-dose or multidose preparation intended for ocular use. The active substance is released over an extended period of time.
Konsantreler		Concentrates	
Konsantre infüzyonluk çözelti için konsantre	13001000	Concentrate for concentrate for solution for infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a concentrate for solution for infusion, which in turn is intended to be diluted in the specified liquid to obtain a solution for infusion.
Enjeksiyonluk çözelti için konsantre	11209000	Concentrate for solution for injection	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a solution for injection.
Enjeksiyonluk süspansiyon için konsantre	13004000	Concentrate for suspension for injection	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a suspension for injection.
Gözüğü yıkama çözeltisi için konsantre	10600500	Concentrate for solution for intraocular irrigation	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a solution for intraocular irrigation.
Hemodiyaliz çözeltisi için konsantre	11405000	Concentrate for solution for haemodialysis	Liquid preparation consisting of an aqueous solution of electrolytes intended to be diluted with water of a suitable quality to obtain a solution for haemodialysis. Glucose may be included.

İnfüzyonluk çözelti için konsantr	11213000	Concentrate for solution for infusion	Liquid sterile preparation consisting of an aqueous solution intended to be diluted in the specified aqueous liquid to obtain a solution for infusion. It may be added to a solution for infusion during the administration.
İnfüzyonluk dispersiyon için konsantr	50009300	Concentrate for dispersion for infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a dispersion for infusion.
İnfüzyonluk emülsiyon için konsantr	50009500	Concentrate for emulsion for infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain an emulsion for infusion.
İnfüzyonluk/enjeksiyonluk çözelti için konsantr	50079000	Concentrate for solution for injection/infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a solution for injection/infusion.
Karın zarı diyalizi çözeltisi için konsantr	50013250	Concentrate for solution for peritoneal dialysis	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a solution for peritoneal dialysis.
Mesane içi çözeltisi için konsantr	50009750	Concentrate for intravesical solution	Liquid preparation intended to be diluted in the specified liquid to obtain an intravesical solution.
Dispersiyonlar		Dispersions	
Dispersiyon için infüzyonluk konsantr dispersiyon	13005000	Dispersion for concentrate for dispersion for infusion	Liquid sterile preparation consisting of a dispersion intended for use in the preparation of a concentrate for dispersion for infusion, which in turn is intended to be diluted in the specified liquid to obtain a dispersion for infusion.
Enjeksiyonluk dispersiyon	50077000	Dispersion for injection	Liquid sterile preparation consisting of two or more phases of which at least one is dispersed in the liquid phase, intended for administration by injection. To be used only when emulsion for injection is not appropriate. Solid suspension preparations are excluded.
İnfüzyonluk dispersiyon	50017500	Dispersion for infusion	Liquid sterile preparation consisting of two or more phases of which at least one is dispersed in the liquid phase, intended to be introduced, usually in large volumes, usually into the circulating blood stream. To be used only when emulsion for infusion is not appropriate. Solid suspension preparations are excluded.
İnfüzyonluk/enjeksiyonluk dispersiyon	13049000	Dispersion for injection/infusion	Sterile liquid preparation consisting of two or more phases of which at least one is dispersed in the liquid phase, intended for administration by injection or infusion. To be used only when emulsion for injection/infusion is not appropriate. Solid suspension preparations are excluded.
Emülsiyonlar		Emulsions	
Enjeksiyonluk / infüzyonluk emülsiyon	50021000	Emulsion for injection/infusion	Liquid sterile single-dose or multidose preparation consisting of an emulsion intended for administration by injection or infusion.
Enjeksiyonluk emülsiyon	11203000	Emulsion for injection	Liquid sterile single-dose or multidose preparation consisting of an emulsion intended for administration by injection.
Enjeksiyonluk emülsiyon için emülsiyon	13008000	Emulsion for emulsion for injection	Liquid sterile preparation consisting of an emulsion intended for use in the preparation of an emulsion for injection.
Enjeksiyonluk süspansiyon için emülsiyon	13091000	Emulsion for suspension for injection	Liquid sterile preparation consisting of an emulsion intended for use in the preparation of a suspension for injection.
Göz damlası, emülsiyon	10604500	Eye drops, emulsion	Liquid sterile single-dose or multidose preparation consisting of an emulsion intended for ocular use. Multidose preparations are presented in containers that allow successive drops to be administered. The containers contain usually at most 10 mL of the preparation.
İnfüzyonluk emülsiyon	11211000	Emulsion for infusion	Liquid sterile preparation consisting of an oil-in-water emulsion intended to be introduced, usually in large volumes, usually into the circulating blood stream.
Üretral emülsiyon	13077000	Urethral emulsion	Liquid preparation consisting of an emulsion intended for urethral use by means of a suitable applicator.
Süspansiyonlar		Suspensions	
Enjeksiyonluk emülsiyon için süspansiyon	13036000	Suspension for emulsion for injection	Liquid sterile preparation consisting of a suspension intended for use in the preparation of an emulsion for injection.
Enjeksiyonluk süspansiyon	11202000	Suspension for injection	Liquid sterile single-dose or multidose preparation consisting of a suspension intended for administration by injection.
Enjeksiyonluk süspansiyon için süspansiyon	13039000	Suspension for suspension for injection	Liquid sterile preparation consisting of a suspension intended for use in the preparation of a suspension for injection.
Enjeksiyonluk uzatılmış salımlı süspansiyon	11208500	Prolonged-release suspension for injection	Liquid sterile preparation consisting of a suspension intended for administration by injection; the active substance(s) are released over an extended period of time.
Göz damlası, süspansiyon	10605000	Eye drops, suspension	Liquid sterile single-dose or multidose preparation consisting of an aqueous or oily suspension intended for ocular use. Multidose preparations are presented in containers that allow successive drops to be administered. The containers contain usually at most 10 mL of the preparation.
İmplantasyon süspansiyonu	11303500	Implantation suspension	Liquid sterile preparation consisting of a suspension intended for implantation in the body; the active substance(s) are released over an extended period of time to obtain a local or systemic effect.
Kulak/göz damlası, süspansiyon	50018500	Ear/eye drops, suspension	Liquid sterile preparation consisting of a suspension intended for use as ear drops or eye drops.
Mesane içi süspansiyon	13045000	Intravesical suspension	Liquid preparation consisting of a small-volume suspension intended for intravesical use by means of a suitable applicator.
1.1.1.5 Katılar ve İmplantlar		1.1.1.5 Solids and implants	
Çubuklar		Sticks	
Üretra çubuğu	11505000	Urethral stick	Solid sterile single-dose preparation, usually rod-shaped and of a size adapted to the dimensions of the urethra, intended for insertion into the urethra. They may be prepared by compression or moulding.

Yara çubuğu	12104000	Wound stick	Solid sterile single-dose preparation, usually rod-shaped or conical, consisting of active substance(s) dissolved or dispersed in a suitable basis that may dissolve or melt at body temperature, intended to be inserted into wounds.
Dozurulmuş Matrisler		Impregnated Materials	
Göz şeridi	10613000	Ophthalmic strip	Solid sterile single-dose preparation consisting of a strip made of a suitable material usually impregnated with active substance(s) intended for use on the eyeball.
İmplantasyon matrisi için matris	13018000	Matrix for implantation matrix	Solid sterile preparation consisting of a usually pliable, absorbent piece of material (e.g. collagen) intended to be used in the preparation of an implantation matrix.
Yapıştırıcı matris	12115100	Sealant matrix	Solid sterile preparation consisting of a pliable piece of material impregnated or coated with a sealant or with a powder that forms a sealant after contact with an appropriate fluid (e.g. blood). It may act as a haemostatic agent and/or tissue glue. The matrix may itself form part of the seal, and is usually absorbed by the body over time.
Granüller		Granules	
Enjeksiyonluk süspansiyon için granül	13048000	Granules for suspension for injection	Solid sterile preparation consisting of granules intended to be dispersed in the specified liquid to obtain a suspension for injection.
İmplantlar		Implants	
İmplant	11301000	Implant	Solid sterile preparation of a size and shape suitable for implantation. It may be prepared by moulding or other means other than compression. Each implant is presented in a sterile container that may be provided with an administration device. Implants are intended for release over an extended period of time in order to obtain local or systemic effect. 'Implantation tablet', 'Implantation chain' and 'Implantation matrix' are excluded.
İmplantasyon matrisi	11303300	Implantation matrix	Solid sterile preparation consisting of a usually pliable, absorbent piece of material (e.g. collagen), usually impregnated with a liquid preparation, intended for implantation in the body. The material may be cut into smaller pieces before implantation, and may be shaped around a tissue (e.g. a bone) or inserted into a medical device that is then implanted. Implantation matrices are intended for release over an extended period of time, usually in order to obtain a local effect. Usually the matrix disappears with time. When the product is packaged as a separate matrix, powder and solvent (or matrix and solution), which are used to prepare the implantation matrix immediately before use, the appropriate combined term should be used; see for example 'Powder, solvent and matrix for implantation matrix'.
İmplantasyon zinciri	11303000	Implantation chain	Solid sterile preparation consisting of small spheres mounted on a non-degradable thread to form a chain that allows withdrawal of the remainder of the chain after a certain period of action. Each implantation chain is presented in a sterile container. The implantation chain is intended for release over an extended period of time in order to obtain local or systemic effect.
İnsertler		Inserts	
Göz diski	10612000	Ophthalmic insert	Solid sterile preparation of suitable size and shape, designed to be inserted in the conjunctival sac to produce a local or ocular effect by the release of active substance(s) over a determined period of time. Ophthalmic inserts generally consist of a reservoir of active substance(s) embedded in a matrix or bounded by a rate-controlling membrane. They are presented individually in sterile containers.
Tabletler		Tablets	
İmplantasyon tableti	11302000	Implantation tablet	Solid sterile preparation prepared by compression of a solid active substance as such or of a formulation thereof into an implant of a size and shape suitable for implantation, usually subcutaneously. Each implantation tablet is presented in a sterile container. Implantation tablets are intended for release over an extended period of time in order to obtain local or systemic effect.
Tozlar		Powders	
Deri çizme testi için çözelti toz	13032000	Powder for solution for skin-prick test	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a solution for skin-prick test.
Enjeksiyon için uzatılmış salımlı süspansiyonluk toz	11208400	Powder for prolonged-release suspension for injection	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a prolonged-release suspension for injection.
Enjeksiyonluk çözelti tozu	11205000	Powder for solution for injection	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a solution for injection.
Enjeksiyonluk çözelti/mesane içi çözeltisi için toz	50050500	Powder for intravesical solution/solution for injection	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain an intravesical solution/solution for injection.
Enjeksiyonluk dispersiyon için toz	13023000	Powder for dispersion for injection	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a dispersion for injection.
Enjeksiyonluk emülsiyon için toz	13040000	Powder for emulsion for injection	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be mixed with the specified liquid to obtain an emulsion for injection.
Enjeksiyonluk süspansiyon tozu	11206000	Powder for suspension for injection	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a suspension for injection.
Enjeksiyonluk/deri çizme testi için çözelti toz	13052000	Powder for solution for injection/skin-prick test	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a solution for injection/skin-prick test.

Enjeksiyonluk/infüzyonluk çözelti için konsantrelik toz	50049250	Powder for concentrate for solution for injection/infusion	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a concentrate for solution for injection/infusion, which must subsequently be diluted before administration as a solution for injection/infusion.
Göz damlası, çözelti toz	13010000	Eye drops, powder for solution	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain an eye drops solution.
Göz damlası, süspansiyonluk toz	13011000	Eye drops, powder for suspension	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain an eye drops suspension.
Göz içi yıkama çözeltisi tozu	50073000	Powder for solution for intraocular irrigation	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a solution for intraocular irrigation.
Göz içi damlatma çözeltisi için toz	13029000	Powder for intraocular instillation solution	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain an intraocular instillation solution.
Hemodiyaliz çözeltisi için konsantrelik toz	50049200	Powder for concentrate for solution for haemodialysis	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a concentrate for solution for haemodialysis, which must subsequently be diluted before use as a solution for haemodialysis.
İmplantasyon süspansiyonu için toz	50049500	Powder for implantation suspension	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain an implantation suspension.
İmplantasyon matrisi için toz	13027000	Powder for implantation matrix	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be used in the preparation of an implantation matrix, e.g. by dissolving in the specified liquid to prepare the solution used to impregnate the matrix.
İmplantasyon matrisi patı için toz	13028000	Powder for implantation paste	Solid sterile preparation consisting of one or more powders intended to be mixed with the specified liquid or paste to obtain an implantation paste.
İnfüzyonluk çözelti için toz	11212000	Powder for solution for infusion	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified aqueous liquid to obtain a solution for infusion.
İnfüzyonluk çözelti için konsantrelik toz	50043000	Powder for concentrate for solution for infusion	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a concentrate for solution for infusion, which must subsequently be diluted before administration as a solution for infusion.
İnfüzyonluk dispersiyon için konsantrelik toz	50048750	Powder for concentrate for dispersion for infusion	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a concentrate for dispersion for infusion, which must subsequently be diluted before administration as a dispersion for infusion.
İnfüzyonluk dispersiyon için toz	11211500	Powder for dispersion for infusion	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a dispersion for infusion.
İnfüzyonluk/enjeksiyonluk çözelti için toz	50053500	Powder for solution for injection/infusion	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a solution for injection/infusion.
Mesane yıkama çözeltisi için toz	11503000	Powder for bladder irrigation	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in sterile water to obtain a bladder irrigation.
Mesane içi süspansiyonu için konsantrelik toz	50049100	Powder for concentrate for intravesical suspension	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a concentrate for intravesical suspension, which must subsequently be diluted before administration as an intravesical suspension.
Doku yapıştırıcı için toz	13031000	Powder for sealant	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a sealant.
Doku yapıştırıcı toz	12115200	Sealant powder	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be applied directly onto the intended site (e.g. a lesion) to form a haemostatic agent and/or tissue glue after contact with an appropriate fluid (e.g. blood).
Yara çözeltisi için toz	50049300	Powder for epilesional solution	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain an epilesional solution.
1.1.1.6 Diğer Aseptik Hazırlanan Ürünler (Açıklama giriniz.)		1.1.1.6 Other aseptically prepared products (...clarify)	
Doku yapıştırıcı toz ve çözücüsü	12116000	Powder and solvent for sealant	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a sealant by dissolving the powder in the solvent.
Doz dağıtım kartuşta enjeksiyonluk çözelti	13071000	Solution for injection in dose-dispenser cartridge	Medicinal product consisting of a solution for injection presented in a dose-dispenser cartridge.
Enjeksiyonluk çözelti için toz ve çözelti	50041500	Powder and solution for solution for injection	Sterile powder (including freeze-dried powder) and sterile solution, both containing active substance(s), intended for the preparation of a solution for injection by dissolving the powder in the solution.
Enjeksiyonluk çözelti için konsantre ve toz	50007000	Concentrate and solvent for solution for injection	Sterile concentrate and sterile solvent intended for the preparation of a solution for injection by diluting the concentrate with the solvent.
Enjeksiyonluk çözelti tozu ve çözücüsü	11207000	Powder and solvent for solution for injection	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a solution for injection by dissolving the powder in the solvent.
Enjeksiyonluk dispersiyon için toz ve çözücü	50044500	Powder and solvent for dispersion for injection	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a dispersion for injection by dispersing the powder in the solvent.
Enjeksiyonluk emülsiyon için emülsiyon ve süspansiyon	50021500	Emulsion and suspension for emulsion for injection	Sterile emulsion and sterile suspension, both of which contain active substance(s), intended for the preparation of an emulsion for injection by mixing the emulsion and the suspension.
Enjeksiyonluk emülsiyon için toz ve çözücü	50044700	Powder and solvent for emulsion for injection	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of an emulsion for injection by mixing the powder and the solvent.
Enjeksiyonluk süspansiyon granülü ve çözücüsü	50027000	Granules and solvent for suspension for injection	Sterile granules and sterile solvent intended for the preparation of a suspension for injection by dispersing the granules in the solvent.

Enjeksiyonluk süspansiyon için toz ve süspansiyon	50048500	Powder and suspension for suspension for injection	Sterile powder (including freeze-dried powder) and sterile suspension, both of which contain active substance(s), intended for the preparation of a suspension for injection by dispersing the powder in the suspension.
Enjeksiyonluk süspansiyon için konsantr ve çözücü	50008000	Concentrate and solvent for suspension for injection	Sterile concentrate and sterile solvent intended for the preparation of a suspension for injection by diluting the concentrate with the solvent.
Enjeksiyonluk süspansiyon tozu ve çözücüsü	11208000	Powder and solvent for suspension for injection	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a suspension for injection by dispersing the powder in the solvent.
Enjeksiyonluk/deri çizme testi çözeltisi için toz ve çözücü	50048270	Powder and solvent for solution for injection/skin-prick test	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a solution for injection/skin-prick test by dissolving the powder in the solvent.
Enjeksiyonluk/infüzyonluk çözelti için toz ve çözücü	50080000	Powder and solvent for solution for injection/infusion	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a solution for injection/infusion by dissolving the powder in the solvent.
Göz damlası süspansiyonluk toz ve çözücüsü	10607000	Eye drops, powder and solvent for suspension	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of eye drops, suspension, by dispersing the powder in the solvent.
Göz damlası, tek dozluk kapta çözelti	50023000	Eye drops, solution in single-dose container	Medicinal product consisting of an eye drops solution presented in a single-dose container.
Göz damlası, tek dozluk kapta emülsiyon	13104000	Eye drops, emulsion in single-dose container	Medicinal product consisting of an eye drops emulsion presented in a single-dose container.
Göz damlası, tek dozluk kapta süspansiyon	50023100	Eye drops, suspension in single-dose container	Medicinal product consisting of an eye drops suspension presented in a single-dose container.
Göz damlası, tek dozluk kapta uzatılmış salımlı çözelti	50022500	Eye drops, prolonged-release solution in single-dose container	Medicinal product consisting of a prolonged-release eye drops solution presented in a single-dose container.
Göz damlası, toz ve çözücüsü	10606000	Eye drops, powder and solvent for solution	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of eye drops, solution, by dissolving the powder in the solvent.
Göz içine uygulanan damlatma çözelti tozu ve çözücüsü	50047000	Powder and solvent for intraocular instillation solution	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of an intraocular instillation solution by dissolving the powder in the solvent.
Hazır şırıngada implantasyon	50029750	Implant in pre-filled syringe	Medicinal product consisting of an implant presented in a pre-filled syringe.
İğnesiz enjektörde enjeksiyonluk çözelti	50060150	Solution for injection in needle-free injector	Medicinal product consisting of a solution for injection presented in a needle-free injector.
İmplantasyon matrisi için toz, çözücü ve matris	50055350	Powder, solvent and matrix for implantation matrix	Sterile powder (including freeze-dried powder), sterile solvent and sterile matrix intended for the preparation of an implantation matrix, for example by dissolving the powder in the solvent and using the resulting solution to impregnate the matrix.
İmplantasyon patı için toz ve çözücü	11304000	Powder and solvent for implantation paste	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of an implantation paste by dispersing the powder in the solvent.
İnfüzyonluk çözelti için konsantrlik toz ve çözelti	13062000	Powder for concentrate and solution for solution for infusion	Medicinal product consisting of a powder for concentrate for solution for infusion and a solution for solution for infusion, intended for the preparation of a solution for infusion.
İnfüzyonluk çözelti konsantr ve çözücüsü	50006000	Concentrate and solvent for solution for infusion	Sterile concentrate and sterile solvent intended for the preparation of a solution for infusion by diluting the concentrate with the solvent.
İnfüzyonluk çözelti konsantrisi tozu ve çözücüsü	50042000	Powder and solvent for concentrate for solution for infusion	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a concentrate for solution for infusion by dissolving the powder in the solvent; the resulting concentrate for solution for infusion must subsequently be diluted before administration as a solution for infusion.
İnfüzyonluk çözelti tozu ve çözücüsü	11214000	Powder and solvent for solution for infusion	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a solution for infusion by dissolving the powder in the solvent.
İnfüzyonluk/enjeksiyonluk çözelti için çözücü ve konsantr	50007500	Concentrate and solvent for solution for injection/infusion	Sterile concentrate and sterile solvent intended for the preparation of a solution for injection/infusion by diluting the concentrate with the solvent.
İnfüzyonluk/enjeksiyonluk dispersiyon için gaz ve çözücü	50078000	Gas and solvent for dispersion for injection/infusion	Sterile gas and sterile solvent, either in the same compartment or in different compartments, intended for the preparation of a dispersion for injection/infusion by dispersing the gas in the solvent.
İntravitreal implant uygulayıcı	50033500	Intravitreal implant in applicator	Medicinal product consisting of an intravitreal implant presented in an applicator.
Kartuşta enjeksiyonluk çözelti	50060100	Solution for injection in cartridge	Medicinal product consisting of a solution for injection presented in a cartridge.
Kartuşta enjeksiyonluk çözelti için toz ve çözücü	50048050	Powder and solvent for solution for injection in cartridge	Medicinal product consisting of a powder and solvent for solution for injection presented in a cartridge. The powder and solvent are contained in different compartments of the cartridge, which contains all of the components necessary to prepare the solution for injection.
Kartuşta enjeksiyonluk süspansiyon	50063100	Suspension for injection in cartridge	Medicinal product consisting of a suspension for injection presented in a cartridge.
Konsantr infüzyonluk çözelti konsantr ve çözücüsü	50002000	Concentrate and solvent for concentrate for solution for infusion	Sterile concentrate and sterile solvent intended for the preparation of a concentrate for solution for infusion by diluting the concentrate with the solvent; the resulting concentrate for solution for infusion must subsequently be diluted again before administration as a solution for infusion.
Konsantr infüzyonluk dispersiyon için toz, dispersiyon ve çözücü	50048600	Powder, dispersion and solvent for concentrate for dispersion for infusion	Sterile powder (including freeze-dried powder) and sterile dispersion, both of which contain active substance(s), and sterile solvent intended for the preparation of a concentrate for dispersion for infusion; it is prepared as specified in the packaging information; the resulting concentrate for dispersion for infusion must subsequently be diluted before administration as a dispersion for infusion.
Kullanıma hazır enjektörde enjeksiyonluk çözelti	13068000	Solution for injection in pre-filled injector	Medicinal product consisting of a solution for injection presented in a pre-filled injector.
Kullanıma hazır enjektörde enjeksiyonluk süspansiyon	13064000	Suspension for injection in pre-filled injector	Medicinal product consisting of a suspension for injection presented in a pre-filled injector.
Kullanıma hazır kalemde enjeksiyonluk çözelti	50060200	Solution for injection in pre-filled pen	Medicinal product consisting of a solution for injection presented in a pre-filled pen.
Kullanıma hazır kalemde enjeksiyonluk çözelti için toz ve çözücü	50048150	Powder and solvent for solution for injection in pre-filled pen	Medicinal product consisting of a powder and solvent for solution for injection presented in a pre-filled pen. The powder and solvent are contained in different compartments of the pre-filled pen, which contains all of the components necessary to prepare the solution for injection.
Kullanıma hazır kalemde enjeksiyonluk süspansiyon	50063200	Suspension for injection in pre-filled pen	Medicinal product consisting of a suspension for injection presented in a pre-filled pen.

Kullanıma hazır kalemde enjeksiyonluk uzatılmış salımlı süspansiyon için toz ve çözücü	50048010	Powder and solvent for prolonged-release suspension for injection in pre-filled pen	Medicinal product consisting of a powder and solvent for prolonged-release suspension for injection presented in a pre-filled pen. The powder and solvent are contained in different compartments of the pre-filled pen, which contains all of the components necessary to prepare the prolonged-release suspension for injection.
Kullanıma hazır şırıngada enjeksiyonluk çözelti	50060300	Solution for injection in pre-filled syringe	Medicinal product consisting of a solution for injection presented in a pre-filled syringe.
Kullanıma hazır şırıngada enjeksiyonluk çözelti için toz ve çözücü	50048250	Powder and solvent for solution for injection in pre-filled syringe	Medicinal product consisting of a powder and solvent for solution for injection presented in a pre-filled syringe. The powder and solvent are contained in different compartments of the pre-filled syringe, which contains all of the components necessary to prepare the solution for injection.
Kullanıma hazır şırıngada enjeksiyonluk süspansiyon	50063300	Suspension for injection in pre-filled syringe	Medicinal product consisting of a suspension for injection presented in a pre-filled syringe.
Kullanıma hazır şırıngada enjeksiyonluk süspansiyon için çözelti ve süspansiyon	50056600	Solution and suspension for suspension for injection in pre-filled syringe	Medicinal product consisting of a solution and suspension for suspension for injection presented in a pre-filled syringe. The solution and suspension are contained in different compartments of the pre-filled syringe, which contains all of the components necessary to prepare the suspension for injection.
Kullanıma hazır şırıngada enjeksiyonluk süspansiyon için toz ve çözücü	50048300	Powder and solvent for suspension for injection in pre-filled syringe	Medicinal product consisting of a powder and solvent for suspension for injection presented in a pre-filled syringe. The powder and solvent are contained in different compartments of the pre-filled syringe, which contains all of the components necessary to prepare the suspension for injection.
Kullanıma hazır şırıngada enjeksiyonluk uzatılmış salımlı süspansiyon	50056250	Prolonged-release suspension for injection in pre-filled syringe	Medicinal product consisting of a prolonged-release suspension for injection presented in a pre-filled syringe.
Kullanıma hazır şırıngada enjeksiyonluk uzatılmış salımlı süspansiyon için toz ve çözücü	13057000	Powder and solvent for prolonged-release suspension for injection in pre-filled syringe	Medicinal product consisting of a powder and solvent for prolonged-release suspension for injection presented in a pre-filled syringe. The powder and solvent are contained in different compartments of the pre-filled syringe, which contains all of the components necessary to prepare the prolonged-release suspension for injection.
Kullanıma hazır şırıngada enjeksiyonluk/infüzyonluk çözelti	50060500	Solution for injection/infusion in pre-filled syringe	Medicinal product consisting of a solution for injection/infusion presented in a pre-filled syringe.
Kullanıma hazır şırıngada enjeksiyonluk/infüzyonluk emülsiyon	50021250	Emulsion for injection/infusion in pre-filled syringe	Medicinal product consisting of an emulsion for injection/infusion presented in a pre-filled syringe.
Kullanıma hazır şırıngada infüzyonluk çözelti	50058500	Solution for infusion in pre-filled syringe	Medicinal product consisting of a solution for infusion presented in a pre-filled syringe.
Radyofarmasötik ana çözeltilisi	12105000	Radiopharmaceutical precursor	A radionuclide produced for the radio-labelling of another substance prior to administration.
Radyofarmasötik hazırlamak için kit	12107000	Kit for radiopharmaceutical preparation	A preparation to be reconstituted or combined with radionuclides in the final radiopharmaceutical, usually prior to its administration. The word radiopharmaceutical may be omitted if there is no ambiguity on the radiopharmaceutical nature of the product. Combinations with other standard terms are not recommended.
Radyofarmasötik öncül, çözelti	50056500	Radiopharmaceutical precursor, solution	Liquid preparation consisting of a solution containing a radionuclide produced for the radio-labelling of another substance prior to administration.
Tek dozluk kapta göz jeli	50023300	Eye gel in single-dose container	Medicinal product consisting of an eye gel presented in a single-dose container.
Tek dozluk kapta göz merhemi	50023400	Eye ointment in single-dose container	Medicinal product consisting of an eye ointment presented in a single-dose container.
Uygulama sisteminde enjeksiyonluk çözelti	13053000	Solution for injection in administration system	Medicinal product consisting of a solution for injection presented in an administration system.
Uygulama sisteminde infüzyonluk çözelti	11210500	Solution for infusion in administration system	Medicinal product consisting of a solution for infusion presented in an administration system.
Uygulama sisteminde infüzyonluk emülsiyon	13095000	Emulsion for infusion in administration system	Medicinal product consisting of an emulsion for infusion presented in an administration system.
Uzatılmış salımlı enjeksiyonluk süspansiyon tozu ve çözücüsü	50048000	Powder and solvent for prolonged-release suspension for injection	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a prolonged-release suspension for injection by dispersing the powder in the solvent.
Yara çözeltilisi için toz ve çözücü	50045500	Powder and solvent for epilesional solution	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of an epilesional solution by dissolving the powder in the solvent.
1.1.2 Son Kabında Sterilize Edilen Ürünler		1.1.2 Terminally sterilized	
1.1.2.1 Büyük Hacimli Sıvılar		1.1.2.1 Large volume liquids	
Çözeltiler		Solutions	
Göziçi yıkama çözeltilisi	50073500	Solution for intraocular irrigation	Liquid sterile preparation consisting of a solution intended for irrigation of one or more internal structures of the eye, for example during surgical procedures.
Hemodiyaliz / hemofiltrasyon çözeltilisi	50057000	Solution for haemodialysis/haemofiltration	Liquid sterile preparation consisting of a solution intended for use as a solution for haemodialysis or a solution for haemofiltration.
Hemodiyaliz çözeltilisi	11404000	Solution for haemodialysis	Liquid preparation consisting of an aqueous solution containing electrolytes with a concentration close to the electrolytic composition of plasma, intended for use in haemodialysis. Glucose may be included.
Hemodiyafiltrasyon çözeltilisi	11403000	Solution for haemodiafiltration	Liquid sterile preparation consisting of an aqueous solution containing electrolytes with a concentration close to the electrolytic composition of plasma, intended for parenteral use in haemodiafiltration. Glucose may be included.
Hemofiltrasyon çözeltilisi	11402000	Solution for haemofiltration	Liquid sterile preparation consisting of an aqueous solution containing electrolytes with a concentration close to the electrolytic composition of plasma, intended for parenteral use in haemofiltration. Glucose may be included.
İnfüzyonluk çözelti için çözelti	13061000	Solution for solution for infusion	Liquid sterile preparation consisting of a solution intended for use in the preparation of a solution for infusion.
Kan fraksiyonu modifikasyonu çözeltilisi	12103000	Solution for blood fraction modification	Liquid sterile preparation consisting of a solution intended for use in extracorporeal modification of a blood fraction that is returned to the patient following modification.
Kanın pıhtılaşmasını önleyen ve koruyan çözelti	12102000	Anticoagulant and preservative solution for blood	Liquid sterile preparation consisting of an aqueous solution to be mixed with extracorporeal blood.

Kardiyopleji çözeltisi	11209500	Solution for cardioplegia	Liquid sterile preparation consisting of an aqueous solution intended for use in inducing cardiac arrest during heart surgery. Some preparations may require mixing with other preparations prior to administration, for example to adjust the pH.
Kardiyopleji/Organ Saklama çözeltisi	13107000	Solution for cardioplegia/organ preservation	Liquid sterile preparation consisting of an aqueous solution of electrolytes typically at a concentration close to the intracellular electrolyte composition, intended for inducing cardiac arrest during heart surgery, and for storage, protection and/or perfusion of mammalian body organs that are in particular destined for transplantation.
Karın zarı içi çözeltisi	12111500	Intraperitoneal solution	Liquid sterile preparation consisting of a solution intended for intraperitoneal use. 'Solution for peritoneal dialysis' is excluded.
Mesane içi çözelti	11502500	Intravesical solution	Liquid preparation consisting of an aqueous solution intended for intravesical use by means of a suitable applicator. 'Bladder irrigation' is excluded.
Mesane yıkama çözeltisi	11502000	Bladder irrigation	Sterile liquid preparation consisting of sterilised water or an aqueous solution intended for irrigation of the urinary bladder.
Mide yıkama çözeltisi	12114000	Stomach irrigation	Liquid sterile preparation consisting of an aqueous solution intended for irrigation of the stomach.
Organ saklama çözeltisi	12112000	Solution for organ preservation	Liquid sterile preparation consisting of an aqueous solution of electrolytes typically at a concentration close to the intracellular electrolyte composition, intended for storage, protection and/or perfusion of mammalian body organs that are in particular destined for transplantation.
İnfüzyonluk çözelti	11210000	Solution for infusion	Liquid sterile preparation consisting of an aqueous solution intended to be introduced, usually in large volumes, usually into the circulating blood stream.
Peritoneal diyaliz çözeltisi	11401000	Solution for peritoneal dialysis	Liquid sterile preparation consisting of an aqueous solution containing electrolytes with a concentration close to the electrolytic composition of plasma and glucose in varying concentrations or other suitable osmotic agents, intended for intraperitoneal use as a dialysis solution.
Yıkama çözeltisi	12113000	Irrigation solution	Liquid sterile preparation consisting of a large-volume aqueous solution intended for irrigation of body cavities, wounds and surfaces, for example during surgical procedures. Irrigation solutions are either solutions of active substance(s), electrolytes or osmotically active substances in water for injections, or they consist of water for injections as such.
Çözücüler		Solvents	
Göz içi yıkama çözeltisi çözücüsü	50074000	Solvent for solution for intraocular irrigation	Liquid sterile preparation consisting of a solvent containing no active substances, intended for use in the preparation of a solution for intraocular irrigation.
İnfüzyonluk çözelti çözücüsü	50076000	Solvent for solution for infusion	Liquid sterile preparation consisting of a solvent containing no active substances, intended for use in the preparation of a solution for infusion.
Parenteral kullanım için çözücü	11216000	Solvent for parenteral use	Liquid sterile preparation consisting of a solvent containing no active substances, intended for use in the preparation of a product for parenteral use.
Konsantreler		Concentrates	
Konsantrite infüzyonluk çözelti için konsantrite	13001000	Concentrate for concentrate for solution for infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a concentrate for solution for infusion, which in turn is intended to be diluted in the specified liquid to obtain a solution for infusion.
Göziçi yıkama çözeltisi için konsantrite	10600500	Concentrate for solution for intraocular irrigation	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a solution for intraocular irrigation.
Hemodiyaliz çözeltisi için konsantrite	11405000	Concentrate for solution for haemodialysis	Liquid preparation consisting of an aqueous solution of electrolytes intended to be diluted with water of a suitable quality to obtain a solution for haemodialysis. Glucose may be included.
İnfüzyonluk çözelti için konsantrite	11213000	Concentrate for solution for infusion	Liquid sterile preparation consisting of an aqueous solution intended to be diluted in the specified aqueous liquid to obtain a solution for infusion. It may be added to a solution for infusion during the administration.
İnfüzyonluk dispersiyon için konsantrite	50009300	Concentrate for dispersion for infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a dispersion for infusion.
İnfüzyonluk emülsiyon için konsantrite	50009500	Concentrate for emulsion for infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain an emulsion for infusion.
Karın zarı diyalizi çözeltisi için konsantrite	50013250	Concentrate for solution for peritoneal dialysis	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a solution for peritoneal dialysis.
Mesane içi çözeltisi için konsantrite	50009750	Concentrate for intravesical solution	Liquid preparation intended to be diluted in the specified liquid to obtain an intravesical solution.
Dispersiyonlar		Dispersions	
Dispersiyon için infüzyonluk konsantrite dispersiyon	13005000	Dispersion for concentrate for dispersion for infusion	Liquid sterile preparation consisting of a dispersion intended for use in the preparation of a concentrate for dispersion for infusion, which in turn is intended to be diluted in the specified liquid to obtain a dispersion for infusion.
İnfüzyonluk dispersiyon	50017500	Dispersion for infusion	Liquid sterile preparation consisting of two or more phases of which at least one is dispersed in the liquid phase, intended to be introduced, usually in large volumes, usually into the circulating blood stream. To be used only when emulsion for infusion is not appropriate. Solid suspension preparations are excluded.
Emülsiyonlar		Emulsions	
İnfüzyonluk emülsiyon	11211000	Emulsion for infusion	Liquid sterile preparation consisting of an oil-in-water emulsion intended to be introduced, usually in large volumes, usually into the circulating blood stream.
Süspansiyonlar		Suspensions	
İmplantasyon süspansiyonu	11303500	Implantation suspension	Liquid sterile preparation consisting of a suspension intended for implantation in the body; the active substance(s) are released over an extended period of time to obtain a local or systemic effect.

1.1.2.2 Yarı Katılar		1.1.2.2 Semi-solids	
Jel		Gel	
Enjeksiyonluk jel	11204000	Gel for injection	Sterile single-dose preparation consisting of a hydrophilic gel intended for injection into a specific tissue or organ.
Göz jeli	10602000	Eye gel	Semi-solid sterile single-dose or multidose preparation consisting of a gel intended for ocular use. Eye gels may be presented in collapsible tubes fitted with a cannula and having a content of not more than 5 g of the preparation. Eye gels may also be presented in suitably designed single-dose containers. The containers or nozzles of tubes are of a shape that facilitates administration without contamination.
Üretra jeli	11504000	Urethral gel	Semi-solid preparation consisting of a gel intended for urethral use by means of a suitable applicator.
Krem		Cream	
Göz kremi	10601000	Eye cream	Semi-solid sterile single-dose or multidose preparation consisting of a cream intended for ocular use. Eye creams may be presented in collapsible tubes fitted with a cannula and having a content of not more than 5 g of the preparation. Eye creams may also be presented in suitably designed single-dose containers. The containers or nozzles of tubes are of a shape that facilitates administration without contamination.
Köpük		Foam	
Merhem		Ointment	
Göz merhemi	10603000	Eye ointment	Semi-solid sterile single-dose or multidose preparation consisting of an ointment intended for ocular use. Eye ointments may be presented in collapsible tubes fitted with a cannula and having a content of not more than 5 g of the preparation. Eye ointments may also be presented in suitably designed single-dose containers. The containers or nozzles of tubes are of a shape that facilitates administration without contamination.
Kulak / göz merhemi	50019000	Ear/eye ointment	Semi-solid preparation consisting of an ointment intended for auricular or ocular use.
Patlar		Paste	
İmplantasyon patı	13043000	Implantation paste	Semi-solid sterile preparation containing large proportions of solids finely dispersed in the basis, intended to be implanted in the body for release of the active substance(s) over an extended period of time, usually to obtain a systemic effect.
1.1.2.3 Küçük Hacimli Sıvılar		1.1.2.3 Small volume liquids	
Çözeltiler		Solutions	
Deri çizik testi çözeltisi	10549000	Solution for skin-scratch test	Liquid sterile preparation consisting of a solution containing an allergen product intended for diagnostic use in a skin-scratch test.
Deri prik testi çözeltisi	10548000	Solution for skin-prick test	Liquid sterile preparation consisting of a solution containing an allergen product intended for diagnostic use in a skin-prick test.
Doku yapıştırıcısı	12115000	Sealant	Liquid, more or less viscous, sterile preparation intended for use as tissue glue.
Enjeksiyonluk / infüzyonluk çözelti	50060000	Solution for injection/infusion	Liquid sterile single-dose or multidose preparation consisting of a solution intended for administration by injection or infusion.
Enjeksiyonluk çözelti	11201000	Solution for injection	Liquid sterile single-dose or multidose preparation consisting of a solution intended for administration by injection.
Enjeksiyonluk çözelti için çözelti	13033000	Solution for solution for injection	Liquid sterile preparation consisting of a solution intended for use in the preparation of a solution for injection.
Enjeksiyonluk süspansiyon için çözelti	13047000	Solution for suspension for injection	Liquid sterile preparation consisting of a solution intended for use in the preparation of a suspension for injection.
Enjeksiyonluk uzatılmış salımlı çözelti	13076000	Prolonged-release solution for injection	Liquid sterile preparation consisting of a solution intended for administration by injection; the active substance(s) are released over an extended period of time.
Enjeksiyonluk/deri çizme testi için çözelti	13051000	Solution for injection/skin-prick test	Liquid sterile preparation consisting of a solution containing an allergen product intended for diagnostic use in a skin-prick test or as an injection (usually intradermal); it may also be licensed for immunotherapy treatment by injection (usually subcutaneous).
Göz damlası, çözelti	10604000	Eye drops, solution	Liquid sterile single-dose or multidose preparation consisting of an aqueous or oily solution intended for ocular use. Multidose preparations are presented in containers that allow successive drops to be administered. The containers contain usually at most 10 mL of the preparation.
Göz içi damlatma çözeltisi	13044000	Intraocular instillation solution	Liquid sterile preparation consisting of a solution intended to be instilled as drops into an internal part of the eye.
Göz losyonu	10610000	Eye lotion	Liquid sterile single-dose or multidose preparation consisting of an aqueous solution intended for washing or bathing the eye.
Göziçi yıkama çözeltisi	50073500	Solution for intraocular irrigation	Liquid sterile preparation consisting of a solution intended for irrigation of one or more internal structures of the eye, for example during surgical procedures.
İnfüzyonluk çözelti için çözelti	13061000	Solution for solution for infusion	Liquid sterile preparation consisting of a solution intended for use in the preparation of a solution for infusion.
Kan fraksiyonu modifikasyonu çözeltisi	12103000	Solution for blood fraction modification	Liquid sterile preparation consisting of a solution intended for use in extracorporeal modification of a blood fraction that is returned to the patient following modification.
Kanın pıhtılaşmasını önleyen ve koruyan çözelti	12102000	Anticoagulant and preservative solution for blood	Liquid sterile preparation consisting of an aqueous solution to be mixed with extracorporeal blood.

Kardiyopleji çözeltisi	11209500	Solution for cardioplegia	Liquid sterile preparation consisting of an aqueous solution intended for use in inducing cardiac arrest during heart surgery. Some preparations may require mixing with other preparations prior to administration, for example to adjust the pH.
Kulak / göz damlası, çözelti	50018000	Ear/eye drops, solution	Liquid sterile preparation consisting of a solution intended for use as ear drops or eye drops.
Kulak/göz/burun damlası, çözelti	50019500	Ear/eye/nasal drops, solution	Liquid sterile preparation consisting of a solution intended for use as ear drops, eye drops or nasal drops.
Mesane içi çözelti	11502500	Intravesical solution	Liquid preparation consisting of an aqueous solution intended for intravesical use by means of a suitable applicator. 'Bladder irrigation' is excluded.
Mesane içi çözeltisi/enjeksiyonluk çözelti	50033400	Intravesical solution/solution for injection	Liquid sterile preparation consisting of a solution intended for intravesical use or for administration by injection.
İnfüzyonluk çözelti	11210000	Solution for infusion	Liquid sterile preparation consisting of an aqueous solution intended to be introduced, usually in large volumes, usually into the circulating blood stream.
Doku yapıştırıcı çözelti	50061500	Solution for sealant	Liquid sterile preparation consisting of a solution intended for the preparation of a sealant.
Yara çözeltisi	13042000	Epilesional solution	Liquid sterile preparation consisting of a solution intended to be administered onto a lesion.
Çözücüler		Solvents	
Göz damlası hazırlama çözücüsü	10608000	Eye drops, solvent for reconstitution	Liquid preparation consisting of a sterile solvent containing no active substances, intended for reconstitution of a usually freeze-dried powder for eye drops.
Göz içi yıkama çözeltisi çözücüsü	50074000	Solvent for solution for intraocular irrigation	Liquid sterile preparation consisting of a solvent containing no active substances, intended for use in the preparation of a solution for intraocular irrigation.
Göz losyonu hazırlama çözücüsü	10611000	Eye lotion, solvent for reconstitution	Liquid preparation consisting of a sterile solvent containing no active substances, intended for reconstitution of a usually freeze-dried powder for eye lotion.
İnfüzyonluk çözelti çözücüsü	50076000	Solvent for solution for infusion	Liquid sterile preparation consisting of a solvent containing no active substances, intended for use in the preparation of a solution for infusion.
Parenteral kullanım için çözücü	11216000	Solvent for parenteral use	Liquid sterile preparation consisting of a solvent containing no active substances, intended for use in the preparation of a product for parenteral use.
Damlalar		Drops	
Uzatılmış salımlı göz damlası	10609000	Eye drops, prolonged-release	Liquid sterile single-dose or multidose preparation intended for ocular use. The active substance is released over an extended period of time.
Konsantreler		Concentrates	
Enjeksiyonluk çözelti için konsantr	11209000	Concentrate for solution for injection	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a solution for injection.
Enjeksiyonluk süspanسیون için konsantr	13004000	Concentrate for suspension for injection	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a suspension for injection.
Göziçi yıkama çözeltisi için konsantr	10600500	Concentrate for solution for intraocular irrigation	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a solution for intraocular irrigation.
Hemodiyaliz çözeltisi için konsantr	11405000	Concentrate for solution for haemodialysis	Liquid preparation consisting of an aqueous solution of electrolytes intended to be diluted with water of a suitable quality to obtain a solution for haemodialysis. Glucose may be included.
İnfüzyonluk çözelti için konsantr	11213000	Concentrate for solution for infusion	Liquid sterile preparation consisting of an aqueous solution intended to be diluted in the specified aqueous liquid to obtain a solution for infusion. It may be added to a solution for infusion during the administration.
İnfüzyonluk dispersiyon için konsantr	50009300	Concentrate for dispersion for infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a dispersion for infusion.
İnfüzyonluk emülsiyon için konsantr	50009500	Concentrate for emulsion for infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain an emulsion for infusion.
İnfüzyonluk/enjeksiyonluk çözelti için konsantr	50079000	Concentrate for solution for injection/infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a solution for injection/infusion.
Karın zarı diyalizi çözeltisi için konsantr	50013250	Concentrate for solution for peritoneal dialysis	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a solution for peritoneal dialysis.
Konsantr infüzyonluk çözelti için konsantr	13001000	Concentrate for concentrate for solution for infusion	Liquid sterile preparation intended to be diluted in the specified liquid to obtain a concentrate for solution for infusion, which in turn is intended to be diluted in the specified liquid to obtain a solution for infusion.
Mesane içi çözeltisi için konsantr	50009750	Concentrate for intravesical solution	Liquid preparation intended to be diluted in the specified liquid to obtain an intravesical solution.
Dispersiyonlar		Dispersions	
Dispersiyon için infüzyonluk konsantr dispersiyon	13005000	Dispersion for concentrate for dispersion for infusion	Liquid sterile preparation consisting of a dispersion intended for use in the preparation of a concentrate for dispersion for infusion, which in turn is intended to be diluted in the specified liquid to obtain a dispersion for infusion.
Enjeksiyonluk dispersiyon	50077000	Dispersion for injection	Liquid sterile preparation consisting of two or more phases of which at least one is dispersed in the liquid phase, intended for administration by injection. To be used only when emulsion for injection is not appropriate. Solid suspension preparations are excluded.
İnfüzyonluk dispersiyon	50017500	Dispersion for infusion	Liquid sterile preparation consisting of two or more phases of which at least one is dispersed in the liquid phase, intended to be introduced, usually in large volumes, usually into the circulating blood stream. To be used only when emulsion for infusion is not appropriate. Solid suspension preparations are excluded.
İnfüzyonluk/enjeksiyonluk dispersiyon	13049000	Dispersion for injection/infusion	Sterile liquid preparation consisting of two or more phases of which at least one is dispersed in the liquid phase, intended for administration by injection or infusion. To be used only when emulsion for injection/infusion is not appropriate. Solid suspension preparations are excluded.

Emülsiyonlar		Emulsions	
Enjeksiyonluk / infüzyonluk emülsiyon	50021000	Emulsion for injection/infusion	Liquid sterile single-dose or multidose preparation consisting of an emulsion intended for administration by injection or infusion.
Enjeksiyonluk emülsiyon	11203000	Emulsion for injection	Liquid sterile single-dose or multidose preparation consisting of an emulsion intended for administration by injection.
Enjeksiyonluk emülsiyon için emülsiyon	13008000	Emulsion for emulsion for injection	Liquid sterile preparation consisting of an emulsion intended for use in the preparation of an emulsion for injection.
Enjeksiyonluk süspansiyon için emülsiyon	13091000	Emulsion for suspension for injection	Liquid sterile preparation consisting of an emulsion intended for use in the preparation of a suspension for injection.
Göz damlası, emülsiyon	10604500	Eye drops, emulsion	Liquid sterile single-dose or multidose preparation consisting of an emulsion intended for ocular use. Multidose preparations are presented in containers that allow successive drops to be administered. The containers contain usually at most 10 mL of the preparation.
İnfüzyonluk emülsiyon	11211000	Emulsion for infusion	Liquid sterile preparation consisting of an oil-in-water emulsion intended to be introduced, usually in large volumes, usually into the circulating blood stream.
Üretral emülsiyon	13077000	Urethral emulsion	Liquid preparation consisting of an emulsion intended for urethral use by means of a suitable applicator.
Süspansiyonlar		Suspensions	
Enjeksiyonluk emülsiyon için süspansiyon	13036000	Suspension for emulsion for injection	Liquid sterile preparation consisting of a suspension intended for use in the preparation of an emulsion for injection.
Enjeksiyonluk süspansiyon	11202000	Suspension for injection	Liquid sterile single-dose or multidose preparation consisting of a suspension intended for administration by injection.
Enjeksiyonluk süspansiyon için süspansiyon	13039000	Suspension for suspension for injection	Liquid sterile preparation consisting of a suspension intended for use in the preparation of a suspension for injection.
Enjeksiyonluk uzatılmış salımlı süspansiyon	11208500	Prolonged-release suspension for injection	Liquid sterile preparation consisting of a suspension intended for administration by injection; the active substance(s) are released over an extended period of time.
Göz damlası, süspansiyon	10605000	Eye drops, suspension	Liquid sterile single-dose or multidose preparation consisting of an aqueous or oily suspension intended for ocular use. Multidose preparations are presented in containers that allow successive drops to be administered. The containers contain usually at most 10 mL of the preparation.
İmplantasyon süspansiyonu	11303500	Implantation suspension	Liquid sterile preparation consisting of a suspension intended for implantation in the body; the active substance(s) are released over an extended period of time to obtain a local or systemic effect.
Kulak/göz damlası, süspansiyon	50018500	Ear/eye drops, suspension	Liquid sterile preparation consisting of a suspension intended for use as ear drops or eye drops.
Mesane içi süspansiyon	13045000	Intravesical suspension	Liquid preparation consisting of a small-volume suspension intended for intravesical use by means of a suitable applicator.
1.1.2.4 Katılar ve İmplantlar		1.1.2.4 Solids and implants	
Çubuklar		Sticks	
Üretra çubuğu	11505000	Urethral stick	Solid sterile single-dose preparation, usually rod-shaped and of a size adapted to the dimensions of the urethra, intended for insertion into the urethra. They may be prepared by compression or moulding.
Yara çubuğu	12104000	Wound stick	Solid sterile single-dose preparation, usually rod-shaped or conical, consisting of active substance(s) dissolved or dispersed in a suitable basis that may dissolve or melt at body temperature, intended to be inserted into wounds.
Doyurulmuş Matrisler		Impregnated Materials	
Göz şeridi	10613000	Ophthalmic strip	Solid sterile single-dose preparation consisting of a strip made of a suitable material usually impregnated with active substance(s) intended for use on the eyeball.
İmplantasyon matrisi için matris	13018000	Matrix for implantation matrix	Solid sterile preparation consisting of a usually pliable, absorbent piece of material (e.g. collagen) intended to be used in the preparation of an implantation matrix.
Yapıştırıcı matris	12115100	Sealant matrix	Solid sterile preparation consisting of a pliable piece of material impregnated or coated with a sealant or with a powder that forms a sealant after contact with an appropriate fluid (e.g. blood). It may act as a haemostatic agent and/or tissue glue. The matrix may itself form part of the seal, and is usually absorbed by the body over time.
Granüller		Granules	
Enjeksiyonluk süspansiyon için granül	13048000	Granules for suspension for injection	Solid sterile preparation consisting of granules intended to be dispersed in the specified liquid to obtain a suspension for injection.
İmplantlar		Implants	
İmplant	11301000	Implant	Solid sterile preparation of a size and shape suitable for implantation. It may be prepared by moulding or other means other than compression. Each implant is presented in a sterile container that may be provided with an administration device. Implants are intended for release over an extended period of time in order to obtain local or systemic effect. 'Implantation tablet', 'Implantation chain' and 'Implantation matrix' are excluded.

İmplantasyon zinciri	11303000	Implantation matrix	Solid sterile preparation consisting of a usually pliable, absorbent piece of material (e.g. collagen), usually impregnated with a liquid preparation, intended for implantation in the body. The material may be cut into smaller pieces before implantation, and may be shaped around a tissue (e.g. a bone) or inserted into a medical device that is then implanted. Implantation matrices are intended for release over an extended period of time, usually in order to obtain a local effect. Usually the matrix disappears with time. When the product is packaged as a separate matrix, powder and solvent (or matrix and solution), which are used to prepare the implantation matrix immediately before use, the appropriate combined term should be used; see for example 'Powder, solvent and matrix for implantation matrix'.
İmplantasyon matrisi	11303300	Implantation chain	Solid sterile preparation consisting of small spheres mounted on a non-degradable thread to form a chain that allows withdrawal of the remainder of the chain after a certain period of action. Each implantation chain is presented in a sterile container. The implantation chain is intended for release over an extended period of time in order to obtain local or systemic effect.
İnsertler		Inserts	
Göz diski	10612000	Ophthalmic insert	Solid sterile preparation of suitable size and shape, designed to be inserted in the conjunctival sac to produce a local or ocular effect by the release of active substance(s) over a determined period of time. Ophthalmic inserts generally consist of a reservoir of active substance(s) embedded in a matrix or bounded by a rate-controlling membrane. They are presented individually in sterile containers.
Tabletler		Tablets	
İmplantasyon tableti	11302000	İmplantasyon tableti	Solid sterile preparation prepared by compression of a solid active substance as such or of a formulation thereof into an implant of a size and shape suitable for implantation, usually subcutaneously. Each implantation tablet is presented in a sterile container. Implantation tablets are intended for release over an extended period of time in order to obtain local or systemic effect.
Tozlar		Powders	
Deri çizme testi için çözelti toz	13032000	Powder for solution for skin-prick test	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a solution for skin-prick test.
Enjeksiyon için uzatılmış salımlı süspansiyonluk toz	11208400	Powder for prolonged-release suspension for injection	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a prolonged-release suspension for injection.
Enjeksiyonluk çözelti tozu	11205000	Powder for solution for injection	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a solution for injection.
Enjeksiyonluk çözelti/mesane içi çözeltisi için toz	50050500	Powder for intravesical solution/solution for injection	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain an intravesical solution/solution for injection.
Enjeksiyonluk dispersiyon için toz	13023000	Powder for dispersion for injection	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a dispersion for injection.
Enjeksiyonluk emülsiyon için toz	13040000	Powder for emulsion for injection	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be mixed with the specified liquid to obtain an emulsion for injection.
Enjeksiyonluk süspansiyon tozu	11206000	Powder for suspension for injection	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a suspension for injection.
Enjeksiyonluk/deri çizme testi için çözelti toz	13052000	Powder for solution for injection/skin-prick test	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a solution for injection/skin-prick test.
Enjeksiyonluk/infüzyonluk çözelti için konsantrelik toz	50049250	Powder for concentrate for solution for injection/infusion	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a concentrate for solution for injection/infusion, which must subsequently be diluted before administration as a solution for injection/infusion.
Göz damlası, çözelti toz	13010000	Eye drops, powder for solution	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain an eye drops solution.
Göz damlası, süspansiyonluk toz	13011000	Eye drops, powder for suspension	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain an eye drops suspension.
Göz içi yıkama çözeltisi tozu	50073000	Powder for solution for intraocular irrigation	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a solution for intraocular irrigation.
Göziçi damlatma çözeltisi için toz	13029000	Powder for intraocular instillation solution	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain an intraocular instillation solution.
Hemodiyaliz çözeltisi için konsantrelik toz	50049200	Powder for concentrate for solution for haemodialysis	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a concentrate for solution for haemodialysis, which must subsequently be diluted before use as a solution for haemodialysis.
İmplantasyon süspansiyonu için toz	50049500	Powder for implantation suspension	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain an implantation suspension.
İmplantasyon matrisi için toz	13027000	Powder for implantation matrix	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be used in the preparation of an implantation matrix, e.g. by dissolving in the specified liquid to prepare the solution used to impregnate the matrix.
İmplantasyon matrisi patı için toz	13028000	Powder for implantation paste	Solid sterile preparation consisting of one or more powders intended to be mixed with the specified liquid or paste to obtain an implantation paste.
İnfüzyonluk çözelti için toz	11212000	Powder for solution for infusion	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified aqueous liquid to obtain a solution for infusion.

İnfüzyonluk çözelti konsantresi tozu	50043000	Powder for concentrate for solution for infusion	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a concentrate for solution for infusion, which must subsequently be diluted before administration as a solution for infusion.
İnfüzyonluk dispersiyon için konsantrelik toz	50048750	Powder for concentrate for dispersion for infusion	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a concentrate for dispersion for infusion, which must subsequently be diluted before administration as a dispersion for infusion.
İnfüzyonluk dispersiyon için toz	11211500	Powder for dispersion for infusion	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a dispersion for infusion.
İnfüzyonluk/enjeksiyonluk çözelti için toz	50053500	Powder for solution for injection/infusion	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a solution for injection/infusion.
Mesane yıkama çözeltisi için toz	11503000	Powder for bladder irrigation	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in sterile water to obtain a bladder irrigation.
Mesane içi süspansiyonu için konsantrelik toz	50049100	Powder for concentrate for intravesical suspension	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a concentrate for intravesical suspension, which must subsequently be diluted before administration as an intravesical suspension.
Yapıştırıcı için toz	13031000	Powder for sealant	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a sealant.
Yapıştırıcı toz	12115200	Sealant powder	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be applied directly onto the intended site (e.g. a lesion) to form a haemostatic agent and/or tissue glue after contact with an appropriate fluid (e.g. blood).
Yara çözeltileri için toz	50049300	Powder for epilesional solution	Solid sterile preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain an epilesional solution.
1.1.2.5 Diğer Son Kabında Sterilize Edilen Ürünler		1.1.2.5 Other terminally sterilized products (...clarify)	
Doku yapıştırıcı toz ve çözücüsü	12116000	Powder and solvent for sealant	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a sealant by dissolving the powder in the solvent.
Doz dağıtım kartuşta enjeksiyonluk çözelti	13071000	Solution for injection in dose-dispenser cartridge	Medicinal product consisting of a solution for injection presented in a dose-dispenser cartridge.
Enjeksiyonluk çözelti için toz ve çözelti	50041500	Powder and solution for solution for injection	Sterile powder (including freeze-dried powder) and sterile solution, both containing active substance(s), intended for the preparation of a solution for injection by dissolving the powder in the solution.
Enjeksiyonluk çözelti konsantre ve çözücüsü	50007000	Concentrate and solvent for solution for injection	Sterile concentrate and sterile solvent intended for the preparation of a solution for injection by diluting the concentrate with the solvent.
Enjeksiyonluk çözelti tozu ve çözücüsü	11207000	Powder and solvent for solution for injection	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a solution for injection by dissolving the powder in the solvent.
Enjeksiyonluk dispersiyon için toz ve çözücü	50044500	Powder and solvent for dispersion for injection	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a dispersion for injection by dispersing the powder in the solvent.
Enjeksiyonluk emülsiyon için emülsiyon ve süspansiyon	50021500	Emulsion and suspension for emulsion for injection	Sterile emulsion and sterile suspension, both of which contain active substance(s), intended for the preparation of an emulsion for injection by mixing the emulsion and the suspension.
Enjeksiyonluk emülsiyon için toz ve çözücü	50044700	Powder and solvent for emulsion for injection	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of an emulsion for injection by mixing the powder and the solvent.
Enjeksiyonluk süspansiyon granülü ve çözücüsü	50027000	Granules and solvent for suspension for injection	Sterile granules and sterile solvent intended for the preparation of a suspension for injection by dispersing the granules in the solvent.
Enjeksiyonluk süspansiyon için toz ve süspansiyon	50048500	Powder and suspension for suspension for injection	Sterile powder (including freeze-dried powder) and sterile suspension, both of which contain active substance(s), intended for the preparation of a suspension for injection by dispersing the powder in the suspension.
Enjeksiyonluk süspansiyon için konsantre ve çözücü	50008000	Concentrate and solvent for suspension for injection	Sterile concentrate and sterile solvent intended for the preparation of a suspension for injection by diluting the concentrate with the solvent.
Enjeksiyonluk süspansiyon tozu ve çözücüsü	11208000	Powder and solvent for suspension for injection	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a suspension for injection by dispersing the powder in the solvent.
Enjeksiyonluk/deri çizme testi çözeltisi için toz ve çözücü	50048270	Powder and solvent for solution for injection/skin-prick test	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a solution for injection/skin-prick test by dissolving the powder in the solvent.
Enjeksiyonluk/infüzyonluk çözelti için toz ve çözücü	50080000	Powder and solvent for solution for injection/infusion	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a solution for injection/infusion by dissolving the powder in the solvent.
Göz damlası süspansiyonluk toz ve çözücüsü	10607000	Eye drops, powder and solvent for suspension	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of eye drops, suspension, by dispersing the powder in the solvent.
Göz damlası, tek dozluk kapta çözelti	50023000	Eye drops, solution in single-dose container	Medicinal product consisting of an eye drops solution presented in a single-dose container.
Göz damlası, tek dozluk kapta emülsiyon	13104000	Eye drops, emulsion in single-dose container	Medicinal product consisting of an eye drops emulsion presented in a single-dose container.
Göz damlası, tek dozluk kapta süspansiyon	50023100	Eye drops, suspension in single-dose container	Medicinal product consisting of an eye drops suspension presented in a single-dose container.
Göz damlası, tek dozluk kapta uzatılmış salımlı çözelti	50022500	Eye drops, prolonged-release solution in single-dose container	Medicinal product consisting of a prolonged-release eye drops solution presented in a single-dose container.
Göz damlası, toz ve çözücüsü	10606000	Eye drops, powder and solvent for solution	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of eye drops, solution, by dissolving the powder in the solvent.
Göz içine uygulanan damlatma çözelti tozu ve çözücüsü	50047000	Powder and solvent for intraocular instillation solution	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of an intraocular instillation solution by dissolving the powder in the solvent.
Hazır şırıngada implantasyon	50029750	Implant in pre-filled syringe	Medicinal product consisting of an implant presented in a pre-filled syringe.
İğnesiz enjektörde enjeksiyonluk çözelti	50060150	Solution for injection in needle-free injector	Medicinal product consisting of a solution for injection presented in a needle-free injector.

İmplantasyon matrisi için toz, çözücü ve matris	50055350	Powder, solvent and matrix for implantation matrix	Sterile powder (including freeze-dried powder), sterile solvent and sterile matrix intended for the preparation of an implantation matrix, for example by dissolving the powder in the solvent and using the resulting solution to impregnate the matrix.
İmplantasyon patı için toz ve çözücü	11304000	Powder and solvent for implantation paste	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of an implantation paste by dispersing the powder in the solvent.
İnfüzyonluk çözelti için konsantrlik toz ve çözelti	13062000	Powder for concentrate and solution for solution for infusion	Medicinal product consisting of a powder for concentrate for solution for infusion and a solution for solution for infusion, intended for the preparation of a solution for infusion.
İnfüzyonluk çözelti konsantre ve çözücüsü	50006000	Concentrate and solvent for solution for infusion	Sterile concentrate and sterile solvent intended for the preparation of a solution for infusion by diluting the concentrate with the solvent.
İnfüzyonluk çözelti konsantresi tozu ve çözücüsü	50042000	Powder and solvent for concentrate for solution for infusion	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a concentrate fo solution for infusion by dissolving the powder in the solvent; the resulting concentrate for solution for infusion must subsequently be diluted before administration as a solution for infusion.
İnfüzyonluk çözelti tozu ve çözücüsü	11214000	Powder and solvent for solution for infusion	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a solution for infusion by dissolving the powder in the solvent.
İnfüzyonluk/enjeksiyonluk çözelti için çözücü ve konsantre	50007500	Concentrate and solvent for solution for injection/infusion	Sterile concentrate and sterile solvent intended for the preparation of a solution for injection/infusion by diluting the concentrate with the solvent.
İnfüzyonluk/enjeksiyonluk dispersiyon için gaz ve çözücü	50078000	Gas and solvent for dispersion for injection/infusion	Sterile gas and sterile solvent, either in the same compartment or in different compartments, intended for the preparation of a dispersion for injection/infusion by dispersing the gas in the solvent.
Intravitreal implant uygulayıcı	50033500	Intravitreal implant in applicator	Medicinal product consisting of an intravitreal implant presented in an applicator.
Kartuşta enjeksiyonluk çözelti	50060100	Solution for injection in cartridge	Medicinal product consisting of a solution for injection presented in a cartridge.
Kartuşta enjeksiyonluk çözelti için toz ve çözücü	50048050	Powder and solvent for solution for injection in cartridge	Medicinal product consisting of a powder and solvent for solution for injection presented in a cartridge. The powder and solvent are contained in different compartments of the cartridge, which contains all of the components necessary to prepare the solution for injection.
Kartuşta enjeksiyonluk süspansiyon	50063100	Suspension for injection in cartridge	Medicinal product consisting of a suspension for injection presented in a cartridge.
Konsantre infüzyonluk çözelti konsantre ve çözücüsü	50002000	Concentrate and solvent for concentrate for solution for infusion	Sterile concentrate and sterile solvent intended for the preparation of a concentrate for solution for infusion by diluting the concentrate with the solvent; the resulting concentrate for solution for infusion must subsequently be diluted again before administration as a solution for infusion.
Konsantre infüzyonluk dispersiyon için toz, dispersiyon ve çözücü	50048600	Powder, dispersion and solvent for concentrate for dispersion for infusion	Sterile powder (including freeze-dried powder) and sterile dispersion, both of which contain active substance(s), and sterile solvent intended for the preparation of a concentrate for dispersion for infusion; it is prepared as specified in the packaging information; the resulting concentrate for dispersion for infusion must subsequently be diluted before administration as a dispersion for infusion.
Kullanıma hazır enjektörde enjeksiyonluk çözelti	13068000	Solution for injection in pre-filled injector	Medicinal product consisting of a solution for injection presented in a pre-filled injector.
Kullanıma hazır enjektörde enjeksiyonluk süspansiyon	13064000	Suspension for injection in pre-filled injector	Medicinal product consisting of a suspension for injection presented in a pre-filled injector.
Kullanıma hazır kalemde enjeksiyonluk çözelti	50060200	Solution for injection in pre-filled pen	Medicinal product consisting of a solution for injection presented in a pre-filled pen.
Kullanıma hazır kalemde enjeksiyonluk çözelti için toz ve çözücü	50048150	Powder and solvent for solution for injection in pre-filled pen	Medicinal product consisting of a powder and solvent for solution for injection presented in a pre-filled pen. The powder and solvent are contained in different compartments of the pre-filled pen, which contains all of the components necessary to prepare the solution for injection.
Kullanıma hazır kalemde enjeksiyonluk süspansiyon	50063200	Suspension for injection in pre-filled pen	Medicinal product consisting of a suspension for injection presented in a pre-filled pen.
Kullanıma hazır kalemde enjeksiyonluk uzatılmış salımlı süspansiyon için toz ve çözücü	50048010	Powder and solvent for prolonged-release suspension for injection in pre-filled pen	Medicinal product consisting of a powder and solvent for prolonged-release suspension for injection presented in a pre-filled pen. The powder and solvent are contained in different compartments of the pre-filled pen, which contains all of the components necessary to prepare the prolonged-release suspension for injection.
Kullanıma hazır şırıngada enjeksiyonluk çözelti	50060300	Solution for injection in pre-filled syringe	Medicinal product consisting of a solution for injection presented in a pre-filled syringe.
Kullanıma hazır şırıngada enjeksiyonluk çözelti için toz ve çözücü	50048250	Powder and solvent for solution for injection in pre-filled syringe	Medicinal product consisting of a powder and solvent for solution for injection presented in a pre-filled syringe. The powder and solvent are contained in different compartments of the pre-filled syringe, which contains all of the components necessary to prepare the solution for injection.
Kullanıma hazır şırıngada enjeksiyonluk süspansiyon	50063300	Suspension for injection in pre-filled syringe	Medicinal product consisting of a suspension for injection presented in a pre-filled syringe.
Kullanıma hazır şırıngada enjeksiyonluk süspansiyon için çözelti ve süspansiyon	50056600	Solution and suspension for suspension for injection in pre-filled syringe	Medicinal product consisting of a solution and suspension for suspension for injection presented in a pre-filled syringe. The solution and suspension are contained in different compartments of the pre-filled syringe, which contains all of the components necessary to prepare the suspension for injection.
Kullanıma hazır şırıngada enjeksiyonluk süspansiyon için toz ve çözücü	50048300	Powder and solvent for suspension for injection in pre-filled syringe	Medicinal product consisting of a powder and solvent for suspension for injection presented in a pre-filled syringe. The powder and solvent are contained in different compartments of the pre-filled syringe, which contains all of the components necessary to prepare the suspension for injection.
Kullanıma hazır şırıngada enjeksiyonluk uzatılmış salımlı süspansiyon	50056250	Prolonged-release suspension for injection in pre-filled syringe	Medicinal product consisting of a prolonged-release suspension for injection presented in a pre-filled syringe.
Kullanıma hazır şırıngada enjeksiyonluk uzatılmış salımlı süspansiyon için toz ve çözücü	13057000	Powder and solvent for prolonged-release suspension for injection in pre-filled syringe	Medicinal product consisting of a powder and solvent for prolonged-release suspension for injection presented in a pre-filled syringe. The powder and solvent are contained in different compartments of the pre-filled syringe, which contains all of the components necessary to prepare the prolonged-release suspension for injection.
Kullanıma hazır şırıngada enjeksiyonluk/infüzyonluk çözelti	50060500	Solution for injection/infusion in pre-filled syringe	Medicinal product consisting of a solution for injection/infusion presented in a pre-filled syringe.
Kullanıma hazır şırıngada enjeksiyonluk/infüzyonluk emülsiyon	50021250	Emulsion for injection/infusion in pre-filled syringe	Medicinal product consisting of an emulsion for injection/infusion presented in a pre-filled syringe.
Kullanıma hazır şırıngada infüzyonluk çözelti	50058500	Solution for infusion in pre-filled syringe	Medicinal product consisting of a solution for infusion presented in a pre-filled syringe.

Radyofarmasötik ana çözeltisi	12105000	Radiopharmaceutical precursor	A radionuclide produced for the radio-labelling of another substance prior to administration.
Radyofarmasötik hazırlamak için kit	12107000	Kit for radiopharmaceutical preparation	A preparation to be reconstituted or combined with radionuclides in the final radiopharmaceutical, usually prior to its administration. The word radiopharmaceutical may be omitted if there is no ambiguity on the radiopharmaceutical nature of the product. Combinations with other standard terms are not recommended.
Radyofarmasötik öncül, çözelti	50056500	Radiopharmaceutical precursor, solution	Liquid preparation consisting of a solution containing a radionuclide produced for the radio-labelling of another substance prior to administration.
Tek dozluk kapta göz jeli	50023300	Eye gel in single-dose container	Medicinal product consisting of an eye gel presented in a single-dose container.
Tek dozluk kapta göz merhemi	50023400	Eye ointment in single-dose container	Medicinal product consisting of an eye ointment presented in a single-dose container.
Uygulama sisteminde enjeksiyonluk çözelti	13053000	Solution for injection in administration system	Medicinal product consisting of a solution for injection presented in an administration system.
Uygulama sisteminde infüzyonluk çözelti	11210500	Solution for infusion in administration system	Medicinal product consisting of a solution for infusion presented in an administration system.
Uygulama sisteminde infüzyonluk emülsiyon	13095000	Emulsion for infusion in administration system	Medicinal product consisting of an emulsion for infusion presented in an administration system.
Uzatılmış salımlı enjeksiyonluk süspansiyon tozu ve çözücüsü	50048000	Powder and solvent for prolonged-release suspension for injection	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of a prolonged-release suspension for injection by dispersing the powder in the solvent.
Yara çözeltisi için toz ve çözücü	50045500	Powder and solvent for epilesional solution	Sterile powder (including freeze-dried powder) and sterile solvent intended for the preparation of an epilesional solution by dissolving the powder in the solvent.
1.1.3 Seri Serbest Bırakma İşlemleri		1.1.3 Batch Certification	
1.2 Steril Olmayan Ürünler		1.2 Non-sterile products	
1.2.1 Steril Olmayan Ürünler		1.2.1 Non-sterile products	
1.2.1.1 Sert Kapsüller		1.2.1.1 Capsules, hard shell	
Değiştirilmiş salımlı sert kapsül	10217000	Modified-release capsule, hard	Solid single-dose preparation consisting of a hard shell containing a solid or semi-solid formulation, showing a rate, a place and/or a time of release different from that of a conventional-release capsule. This deliberate modification is achieved by a special formulation design and/or manufacturing method. Hard modified-release capsules are intended for oral use, and include prolonged-release, delayed-release and pulsatile-release preparations. The generic term 'modified-release capsule, hard' is used only when the more specific terms 'gastro-resistant capsule, hard' or 'prolonged-release capsule, hard' do not apply.
Enterik sert kapsül	10212000	Gastro-resistant capsule, hard	Solid single-dose, delayed-release preparation contained in a hard shell. The preparation is intended to resist the gastric fluid and to release the active substance(s) in the intestinal fluid. Hard gastro-resistant capsules are usually made by filling hard capsules with gastro-resistant granules or solid particles made gastro-resistant by coating or, in certain cases, by providing hard capsules with a gastro-resistant shell. They are intended for oral use.
İnhalasyon buharı, kapsül	11113000	Inhalation vapour, capsule	Solid preparation consisting of a capsule formulation intended for generation of vapour to be inhaled to obtain a local effect. The vapour is usually generated by adding the whole capsule or the capsule contents to hot water.
Sert kapsül	10210000	Capsule, hard	Solid single-dose preparation contained in a hard shell, the capacity of which can be varied. The shell is made of gelatin or other substances. It consists of two prefabricated cylindrical sections one end of which is rounded and closed, the other being open. The contents of the shell may be a solid or semi-solid preparation, which is filled into one of the sections and closed by slipping the other section over it. Hard capsules are intended for oral use.
Uzatılmış salımlı sert kapsül	10215000	Prolonged-release capsule, hard	Solid single-dose preparation consisting of a hard shell containing a solid or semi-solid formulation, showing a slower release of the active substance(s) than that of a conventional-release capsule. Prolonged release is achieved by a special formulation design and/or manufacturing method. Hard prolonged-release capsules are intended for oral use.
Vajinal sert kapsül	10910000	Vaginal capsule, hard	Solid single-dose preparation consisting of a hard capsule of a size and shape suited for vaginal use, containing a liquid or semi-solid formulation, intended for a local effect.
1.2.1.2 Yumuşak Kapsüller		1.2.1.2 Capsules, soft shell	
Ağız mukoza kapsülü	10317000	Oromucosal capsule	Solid single-dose preparation contained in a soft shell to be chewed or sucked to obtain a local effect in the oral cavity.
Çiğnenebilir kapsül, yumuşak	10214000	Chewable capsule, soft	Solid single-dose preparation contained in a soft shell. The soft capsule is intended to be chewed to release its contents into the mouth. The contents of the soft shell may be a semi-solid or liquid preparation intended for local action or systemic delivery after absorption through the oral mucosa or, when swallowed, in the gastrointestinal tract.
Değiştirilmiş salımlı yumuşak kapsül	10218000	Modified-release capsule, soft	Solid single-dose preparation consisting of a soft shell containing a semi-solid or liquid formulation, showing a rate, a place and/or a time of release different from that of a conventional-release capsule. This deliberate modification is achieved by a special formulation design and/or manufacturing method. Soft modified-release capsules are intended for oral use, and include prolonged-release, delayed-release and pulsatile-release preparations. The generic term 'modified-release capsule, soft' is used only when the more specific terms 'gastro-resistant capsule, soft' or 'prolonged-release capsule, soft' do not apply.

Enterik yumuşak kapsül	10213000	Gastro-resistant capsule, soft	Solid single-dose, delayed-release preparation contained in a soft shell. The preparation is intended to resist the gastric fluid and to release the active substance(s) in the intestinal fluid. Soft gastro-resistant capsules are usually formed, filled and sealed in one operation. They may contain a liquid or semi-solid preparation in the gastro-resistant shell. Soft gastro-resistant capsules are intended for oral use.
Rektal yumuşak kapsül	11014000	Rectal capsule	Solid single-dose preparation consisting of a soft capsule of elongated shape suitable for rectal use, containing a liquid or semi-solid formulation, and which may have a lubricating coating.
Uzatılmış salımlı yumuşak kapsül	10216000	Prolonged-release capsule, soft	Solid single-dose preparation consisting of a soft shell containing a semi-solid or liquid formulation, showing a slower release of the active substance(s) than that of a conventional-release capsule. Prolonged release is achieved by a special formulation design and/or manufacturing method. Soft prolonged-release capsules are intended for oral use.
Vajinal yumuşak kapsül	10911000	Vaginal capsule, soft	Solid single-dose preparation consisting of a soft capsule of a size and shape suited for vaginal use, containing a liquid or semi-solid formulation, intended for a local effect.
Yumuşak kapsül	10211000	Capsule, soft	Solid single-dose preparation contained in a soft shell, the capacity and shape of which can be varied. The shell is made of gelatin or other substances and may contain (a) solid active substance(s). The shell is thicker than that of hard capsules and consists of one part as soft capsules usually are formed, filled and sealed in one operation. The contents of the shell may be a semi-solid or liquid preparation. Soft capsules are intended for oral use.
1.2.1.3 Tıbbi Sakızlar		1.2.1.3 Chewing gums	
İlaçlı sakız	10229000	Medicated chewing-gum	Solid single-dose preparation consisting of a basis, mainly composed of gums, intended to be chewed but not swallowed. The active substance(s) is (are) released in saliva by chewing. Medicated chewing gum is intended for local treatment of mouth diseases or systemic delivery after absorption through the oral mucosa or from the gastrointestinal tract.
Oral sakız	10230000	Oral gum	Solid single-dose preparation with a gum-like consistency, intended to be sucked or chewed before being swallowed. Medicated chewing gum is excluded.
1.2.1.4 Dozurulmuş Matrisler		1.2.1.4 Impregnated matrices	
Emdirilmiş tıkaç	12117500	Impregnated plug	Solid preparation consisting of a piece of material (e.g. polyethylene), usually porous, in which a liquid, semi-solid or solid preparation is impregnated. Implants, pads, sponges and tampons are excluded.
İlaçlı iplik	12130000	Medicated thread	Solid preparation consisting of a biodegradable or non-degradable thread impregnated with active substance(s).
İlaçlı kompres	10525000	Impregnated dressing	Solid preparation consisting of a piece or strip of gauze or other suitable fabric impregnated with a liquid or semi-solid preparation intended for cutaneous use.
İlaçlı sünger	12119000	Medicated sponge	Solid preparation consisting of a sponge impregnated with active substance(s); different routes of administration are possible.
İlaçlı tampon	12117000	Impregnated pad	Solid preparation consisting of a piece of absorbent material impregnated with a liquid preparation.
İlaçlı vajinal tampon	10914000	Medicated vaginal tampon	Solid single-dose preparation consisting of a suitable material impregnated with active substance(s) intended to be inserted in the vagina for a limited period of time.
İnhalasyon buharı, ilaçlı tampon	50033000	Inhalation vapour, impregnated pad	Solid preparation consisting of a piece of absorbent material impregnated usually with a liquid or semi-solid preparation, intended for generation of vapour to be inhaled to obtain a local effect.
Kulak tımponu	10714000	Ear tampon	Solid single-dose preparation intended to be inserted into the external auditory meatus for a limited period of time, consisting of a suitable material impregnated with active substance(s).
Rektal tampon	11015000	Rectal tampon	Solid single-dose preparation consisting of a suitable material impregnated with active substance(s) intended to be inserted in the rectum for a limited period of time usually for a local effect.
Solunma buharı, emdirilmiş tıkaç	50033100	Inhalation vapour, impregnated plug	Solid preparation consisting of an impregnated plug that generates a vapour to be inhaled, for example by the patient inhaling through a device containing the plug, thereby drawing air through or over it and vaporising the active ingredient(s) impregnated therein.
1.2.1.5 Haricî Kullanım İçin Likitler		1.2.1.5 Liquids for external use	
Cıvalar		Lacquers	
Diş cilası	12101000	Denture lacquer	Liquid preparation to be applied to dentures to form a lacquer by evaporation of the volatile solvent.
İlaçlı tırnak cilası	10521000	Medicated nail lacquer	Liquid preparation to be applied to the nails to form a lacquer by evaporation of the volatile solvent.
Çözeltiler		Solutions	
Aerosol inhalasyon, çözelti	11106000	Pressurised inhalation, solution	Liquid, usually multidose preparation consisting of a solution intended for inhalation use. The preparation is presented in a pressurised container usually fitted with a metering dose valve.
Ağız mukoza çözeltisi	10305000	Oromucosal solution	Liquid single-dose or multidose preparation consisting of a solution intended for oromucosal use.
Ağız mukoza spreyi için çözelti	10308200	Oromucosal spray, solution	Liquid, usually multidose preparation consisting of a solution intended for oromucosal use. It is administered by spraying into the oral cavity or onto a specific part of the oral cavity or the throat. It is presented in a container with a spray pump or in a pressurised container with or without a metering valve. Sublingual sprays are excluded.
Ağız mukozası/laringofarenjeal çözelti	50039500	Oromucosal/laryngopharyngeal solution	Liquid preparation consisting of a solution intended for oromucosal or laryngopharyngeal use. 'Oromucosal/laryngopharyngeal solution/spray, solution' is excluded.
Ağız mukozası/laringofarenjeal çözelti/sprey, çözelti	50040500	Oromucosal/laryngopharyngeal solution/spray, solution	Liquid preparation consisting of a solution intended for oromucosal or laryngopharyngeal use, presented in a container with an optional spray device to allow administration as a spray.
Burun damlası, çözelti	10804000	Nasal drops, solution	Liquid single-dose or multidose preparation consisting of a solution intended for nasal use by means of a suitable applicator.

Burun spreyi, çözelti	10808000	Nasal spray, solution	Liquid single-dose or multidose preparation consisting of a solution in a container with or without a metering dose valve or in a container with a spray pump or equivalent device to create a spray, intended for nasal use.
Burun spreyi, çözelti/ağız mukozası çözeltisi	50037400	Nasal spray, solution/oromucosal solution	Liquid preparation consisting of a solution intended for use as a nasal spray or an oromucosal solution.
Burun yıkama çözeltisi	10811000	Nasal wash	Liquid single-dose or multidose preparation consisting of usually an aqueous isotonic solution intended for cleansing the nasal cavities.
Burun/ağız mukoza spreyi, çözelti	50036700	Nasal/oromucosal spray, solution	Liquid preparation consisting of a solution in a container with or without a metering dose valve or in a container with a spray pump, intended for nasal or oromucosal use.
Burun/ağız mukozası çözeltisi	50036500	Nasal/oromucosal solution	Liquid preparation consisting of a solution intended for nasal or oromucosal application. 'Nasal/oromucosal spray, solution' and 'Nasal spray, solution/oromucosal solution' are excluded.
Deri çözeltisi	10513000	Cutaneous solution	Liquid, usually multidose preparation consisting of a solution of the active substance in a suitable vehicle intended for cutaneous use.
Deri çözeltisi/konsantre ağız mukoza çözeltisi	50015450	Cutaneous solution/concentrate for oromucosal solution	Liquid preparation consisting of a solution intended for cutaneous use or intended to be diluted in the specified liquid to obtain an oromucosal solution.
Deri spreyi çözelti	10509000	Cutaneous spray, solution	Liquid preparation, usually multidose, consisting of a solution in a pressurised container with a spray valve or in a container equipped with a spray pump, intended for cutaneous use.
Dilaltı spreyi, çözelti	10309200	Sublingual spray, solution	Liquid, usually multidose preparation consisting of a solution intended for sublingual use. Sublingual sprays are usually presented in pressurised containers with a metering valve.
Diş çözeltisi	10406000	Dental solution	Liquid, usually multidose preparation consisting of a solution intended for administration on teeth and gums.
Diş dolgu maddesi için çözelti	10414000	Solution for dental cement	Liquid preparation consisting of a solution intended for use in the preparation of a dental cement.
Dişeti çözeltisi	10312000	Gingival solution	Liquid, usually multidose preparation consisting of a solution intended for gingival use.
Endotrakeopulmoner damlatma çözeltisi	11601000	Endotracheopulmonary instillation, solution	Liquid preparation consisting of an aqueous solution intended for instillation to the trachea and/or bronchea. Preparations for inhalation use are excluded.
Gargara	10301000	Gargara	
Gargara / ağız yıkama suyu	50024000	Gargle/mouthwash	Liquid preparation consisting of a solution intended for use as a gargle or a mouthwash.
Gargara/burun yıkama	50024500	Gargle/nasal wash	Liquid preparation consisting of a solution intended for use as a gargle or a nasal wash.
İnhalasyon buharı, çözelti	11114000	Inhalation vapour, solution	Liquid preparation consisting of a solution intended for generation of vapour to be inhaled to obtain a local effect. The vapour is usually generated by adding the solution to hot water.
İyontoforez çözeltisi	10518000	Solution for iontophoresis	Liquid preparation consisting of an aqueous solution intended for transdermal delivery by means of iontophoresis.
Kulak damlası, çözelti	10704000	Ear drops, solution	Liquid single-dose or multidose preparation consisting of an aqueous or oily solution intended for application to the external auditory meatus. Multidose containers may be dropper containers or containers provided with a dropper applicator, or the dropper may be supplied separately. Drops are not necessarily administered dropwise, but may also be administered as a small volume.
Kulak spreyi, çözelti	10709000	Ear spray, solution	Liquid, usually multidose preparation consisting of a solution intended for application to the external auditory meatus by spraying to obtain a local effect. Ear sprays are presented in containers with a spray pump or in pressurised containers fitted with a spray valve.
Kulak yıkama çözeltisi	10712000	Ear wash, solution	Liquid single-dose or multidose preparation consisting usually of an aqueous solution with a pH within physiological limits. Ear washes are intended to clean the external auditory meatus.
Laringofarenjeal çözelti	13016000	Laryngopharyngeal solution	Liquid preparation consisting of a solution intended for administration to the laryngopharynx for a local effect, other than by spraying.
Laringofarenjeal spreyi, çözelti	13017000	Laryngopharyngeal spray, solution	Liquid preparation consisting of a solution intended for spraying onto the laryngopharynx for a local effect.
Nebulizasyon çözeltisi	11101000	Nebuliser solution	Liquid preparation consisting of a solution intended for inhalation use. The solution is converted into an aerosol by a continuously operating nebuliser or a metered-dose nebuliser.
Provokasyon testi için çözelti	12131000	Solution for provocation test	Liquid preparation consisting of a solution containing an allergen intended for provocation testing by the nasal, ocular or bronchial routes.
Rektal çözelti	11005000	Rectal solution	Liquid preparation consisting of a solution intended for rectal use or for diagnostic purposes. Rectal solutions are usually presented in containers with a volume in the range of 2.5 mL to 2000 mL. The container is fitted with an applicator or an applicator is provided separately.
Sinüsiçi çözelti	13041000	Endosinusal solution	Liquid preparation consisting of a solution intended to be administered to the sinuses to obtain a local effect.
Soluma çözeltisi	50081000	Inhalation solution	Liquid, usually multidose preparation consisting of a solution intended for inhalation use. The preparation is presented in a non-pressurised container fitted with a metering dose mechanism. 'Nebuliser solution' and 'Pressurised inhalation, solution' are excluded.
Transdermal çözelti	10546400	Transdermal solution	Liquid single-dose or multidose preparation consisting of a solution intended for transdermal use. The term 'Transdermal solution' is used only when more-specific terms such as 'Pour-on solution', 'Solution for iontophoresis', 'Spot-on solution' and 'Transdermal spray, solution' do not apply.
Transdermal spreyi, çözelti	10546500	Transdermal spray, solution	Liquid, usually multidose preparation consisting of a solution in a pressurised container with a spray valve or a container equipped with a spray pump, intended for transdermal use.
Vajinal çözelti	10905000	Vaginal solution	Liquid preparation consisting of a solution intended for vaginal use by means of a suitable applicator in order to obtain a local effect.
Damlalar		Drops	

Ağız mukoza damlası	10307000	Oromucosal drops	Liquid, usually multidose preparation consisting of a solution, suspension or emulsion intended for oromucosal use. Oromucosal drops are administered by instillation into the oral cavity or onto a specific part of the oral cavity.
Konsantreler		Concentrates	
Ağız mukozası çözeltisi için konsantre	13003000	Concentrate for oromucosal solution	Liquid preparation intended to be diluted in the specified liquid to obtain an oromucosal solution.
Deri çözeltisi için konsantre	10514000	Concentrate for cutaneous solution	Liquid preparation intended to be diluted in the specified liquid to obtain a cutaneous solution.
Deri spreyi için konsantre, emülsiyon	50009000	Concentrate for cutaneous spray, emulsion	Liquid preparation intended to be diluted in the specified liquid to obtain a cutaneous spray emulsion.
Gargara için konsantre	10302000	Concentrate for gargle	Liquid preparation consisting of an aqueous solution intended to be diluted in water to obtain a gargle.
Nebülizer çözelti için konsantre	13002000	Concentrate for nebuliser solution	Liquid preparation intended to be diluted in the specified liquid to obtain a nebuliser solution.
Rektal çözelti için konsantre	11008000	Concentrate for rectal solution	Liquid preparation intended to be diluted in the specified liquid to obtain a rectal solution.
Emülsiyonlar		Emulsions	
Aerosol inhalasyon, emülsiyon	11108000	Pressurised inhalation, emulsion	Liquid, usually multidose preparation consisting of an emulsion intended for inhalation use The preparation is presented in a pressurised container fitted with a metering dose valve.
Ağız mukozası spreyi, emülsiyon	10308100	Oromucosal spray, emulsion	Liquid, usually multidose preparation consisting of an emulsion intended for oromucosal use. It is administered by spraying into the oral cavity or onto a specific part of the oral cavity or the throat. It is presented in a container with a spray pump or in a pressurised container with or without a metering valve. Sublingual sprays are excluded.
Burun damlası, emülsiyon	10806000	Nasal drops, emulsion	Liquid single-dose or multidose preparation consisting of an emulsion intended for nasal use by means of a suitable applicator.
Burun spreyi, emülsiyon	10810000	Nasal spray, emulsion	Liquid single-dose or multidose preparation consisting of an emulsion in a container with or without a metering dose valve or in a container with a spray pump or equivalent device to create a spray, intended for nasal use.
Deri emülsiyonu	10516000	Cutaneous emulsion	Liquid, usually multidose preparation consisting of an emulsion intended for cutaneous use.
Deri spreyi, emülsiyon	50015500	Cutaneous spray, emulsion	Liquid preparation, usually multidose, consisting of an emulsion in a pressurised container with a spray valve or in a container equipped with a spray pump, intended for cutaneous use.
Dilaltı sprey, emülsiyon	10309100	Sublingual spray, emulsion	Liquid, usually multidose preparation consisting of an emulsion intended for sublingual use. Sublingual sprays are usually presented in pressurised containers with a metering valve.
Diş emülsiyonu	10408000	Dental emulsion	Liquid, usually multidose preparation consisting of an emulsion intended for administration on to the teeth and the gums.
İnhalasyon buharı, emülsiyon	50032000	Inhalation vapour, emulsion	Liquid preparation consisting of an emulsion intended for generation of vapour to be inhaled to obtain a local effect. The vapour may be generated by adding the emulsion to hot water.
Kulak damlası, emülsiyon	10706000	Ear drops, emulsion	Liquid single-dose or multidose preparation consisting of an emulsion intended for application to the external auditory meatus. Multidose containers may be dropper containers or containers provided with a dropper applicator, or the dropper may be supplied separately. Drops are not necessarily administered dropwise, but may also be administered as a small volume.
Kulak spreyi, emülsiyon	10711000	Ear spray, emulsion	Liquid, usually multidose preparation consisting of an emulsion intended for application to the external auditory meatus by spraying to obtain local effect. Ear sprays are presented in containers with a spray pump or in pressurised containers fitted with a spray valve.
Kulak yıkama emülsiyonu	10713000	Ear wash, emulsion	Liquid single-dose or multidose preparation consisting usually of an oil-in-water emulsion with a pH within physiological limits. Ear washes are intended to clean the external auditory meatus.
Nebülizör ile inhalasyon emülsiyonu	11105000	Nebuliser emulsion	Liquid preparation consisting of an emulsion intended for inhalation to obtain local effect or systemic delivery. The emulsion is converted into an aerosol by a continuously operating nebuliser or a metered-dose nebuliser.
Rektal emülsiyon	11007000	Rectal emulsion	Liquid preparation consisting of an emulsion intended for rectal use or for diagnostic purposes. Rectal emulsions are usually presented in containers with a volume in the range of 2.5 mL to 2000 mL. The container is fitted with an applicator or an applicator is provided separately.
Üretral emülsiyon	13077000	Urethral emulsion	Liquid preparation consisting of an emulsion intended for urethral use by means of a suitable applicator.
Vajinal emülsiyon	10907000	Vaginal emulsion	Liquid preparation consisting of an emulsion intended for vaginal use by means of a suitable applicator in order to obtain a local effect.
Kollodionlar		Collodions	
Kollodion	10520000	Collodion	Liquid preparation usually containing pyroxylin in a mixture of ether and ethanol. When applied to the skin, the preparation forms a flexible film on the site of application.
Sıvılar		Liquids	
Ağız çalkalama sıvısı	10310000	Gargle	Liquid preparation consisting of an aqueous solution intended for gargling to obtain a local effect in the oral cavity and the throat. Gargles are not to be swallowed.
Deriye uygulanan sıvı	10512000	Cutaneous liquid	Liquid, usually multidose preparation consisting of a liquid active substance per se, intended for cutaneous use.
İnhalasyon buharı, sıvı	11117000	Inhalation vapour, liquid	Liquid preparation consisting of a liquid active substance per se, such as an essential oil or a volatile anaesthetic, intended for generation of vapour to be inhaled. The vapour may be generated by adding the liquid to hot water or by the use of a vaporising device.
Süspansiyonlar		Suspensions	
Aerosol inhalasyon ,süspansiyon	11107000	Pressurised inhalation, suspension	Liquid, usually multidose preparation consisting of a suspension intended for inhalation use. The preparation is presented in a pressurised container fitted with a metering dose valve.

Deri spreyi, süspansiyonu	10510000	Cutaneous spray, suspension	Liquid, usually multidose preparation consisting of a suspension in a pressurised container with a spray valve or in a container equipped with a spray pump, intended for cutaneous use.
Deri süspansiyonu	10515000	Cutaneous suspension	Liquid, usually multidose preparation consisting of a suspension of fine particles in a suitable vehicle intended for cutaneous use.
Dilaltı spreyi, süspansiyon	10309300	Sublingual spray, suspension	Liquid, usually multidose preparation consisting of a suspension intended for sublingual use. Sublingual sprays are usually presented in pressurised containers with a metering valve.
Diş süspansiyonu	10407000	Dental suspension	Liquid, usually multidose preparation consisting of a suspension intended for administration on teeth and gums.
Endotrakeopulmoner damlatma süspansiyonu	11603000	Endotracheopulmonary instillation, suspension	Liquid preparation consisting of an aqueous suspension intended for instillation to the trachea and/or bronchea. Preparations for inhalation use are excluded.
Kulak damlası, süspansiyon	10705000	Ear drops, suspension	Liquid single-dose or multidose preparation consisting of an aqueous or oily suspension intended for application to the external auditory meatus. Multidose containers may be dropper containers or containers provided with a dropper applicator, or the dropper may be supplied separately. Drops are not necessarily administered dropwise, but may also be administered as a small volume.
Kulak spreyi, süspansiyon	10710000	Ear spray, suspension	Liquid, usually multidose preparation consisting of a suspension intended for application to the external auditory meatus by spraying to obtain a local effect. Ear sprays are presented in containers with a spray pump or in pressurised containers fitted with a spray valve.
Nebulizör ile inhalasyon süspansiyonu	11102000	Nebuliser suspension	Liquid preparation consisting of a suspension intended for inhalation use. The suspension is converted into an aerosol by a continuously operating nebuliser or a metered-dose nebuliser.
Ağız mukoza süspansiyonu	10306000	Oromucosal suspension	Liquid single-dose or multidose preparation consisting of a suspension intended for oromucosal use.
Burun damlası, süspansiyon	10805000	Nasal drops, suspension	Liquid single-dose or multidose preparation consisting of a suspension intended for nasal use by means of a suitable applicator.
Burun spreyi, süspansiyon	10809000	Nasal spray, suspension	Liquid single-dose or multidose preparation consisting of a suspension in a container with or without a metering dose valve or in a container with a spray pump or equivalent device to create a spray, intended for nasal use.
Sinüs içi yıkama, süspansiyon	50022000	Endosinusal wash, suspension	Liquid preparation consisting of a suspension intended for cleaning the sinuses.
Kulak/burun damlası, süspansiyon	50020200	Ear/nasal drops, suspension	Liquid preparation consisting of a suspension intended for use as ear drops or nasal drops.
Ağız mukozası spreyi için süspansiyon	10308300	Oromucosal spray, suspension	Liquid, usually multidose preparation consisting of a suspension intended for oromucosal use. It is administered by spraying into the oral cavity or onto a specific part of the oral cavity or the throat. It is presented in a container with a spray pump or in a pressurised container with or without a metering valve.
Rektal süspansiyon	11006000	Rectal suspension	Liquid preparation consisting of a suspension intended for rectal use or for diagnostic purposes. Rectal suspensions are usually presented in containers with a volume in the range of 2.5 mL to 2000 mL. The container is fitted with an applicator or an applicator is provided separately.
Vajinal süspansiyon	10906000	Vaginal suspension	Liquid preparation consisting of a suspension intended for vaginal use by means of a suitable applicator in order to obtain a local effect.
Şampuanlar		Shampoos	
Şampuan	10508000	Shampoo	Liquid or, occasionally, semi-solid, usually multidose preparation intended for application to the scalp by rubbing and subsequent washing away with water. Upon rubbing with water, shampoos usually form foam. Shampoos are solutions, suspensions or emulsions containing surface-active agents.
Banyo katığı	10501000	Bath additive	Solid, semi-solid or liquid preparation to be added to the bath water.
1.2.1.6 Dâhilî Kullanım İçin Likitler		1.2.1.6 Liquids for internal use	
Çözeltiler		Solutions	
Ağızdan/rektal çözelti	50037900	Oral/rectal solution	Liquid preparation consisting of a solution intended for oral or rectal use.
Mide-bağırsak çözeltisi	12108000	Gastroenteral solution	Liquid preparation consisting of a solution intended for administration to the stomach or duodenum by means of a suitable applicator.
Oral çözelti	10105000	Oral solution	Liquid single-dose or multidose preparation consisting of a solution intended for oral use. Each dose from a multidose container is administered by means of a device suitable for measuring the prescribed volume, generally 5 mL or multiples thereof.
Oral çözelti/nebulizer çözelti için konsantr	50038500	Oral solution/concentrate for nebuliser solution	Liquid preparation consisting of a solution intended for oral use or intended to be diluted in the specified liquid to obtain a nebuliser solution.
Oral damla çözelti	10101000	Oral drops, solution	Liquid, usually multidose preparation consisting of a solution intended for oral use. The preparation is administered in small volumes by means of a suitable measuring device such as a dropper, pipette or oral syringe capable of accurate dosing of the solution. The measured dose may be diluted in water or another suitable liquid before swallowing.
Konsantrler		Concentrates	
Ağızdan/makattan çözelti için konsantr	50011000	Concentrate for oral/rectal solution	Liquid preparation intended to be diluted in the specified liquid to obtain an oral/rectal solution.
Konsantr oral sprey için konsantr, süspansiyon	13085000	konsantr oral sprey için konsantr, süspansiyon	Concentrate for concentrate for oral spray, suspension: konsantr ağızdan püskürtücü için konsantr, katı asılı
Oral çözelti için konsantr	50010000	Concentrate for oral solution	Liquid preparation intended to be diluted in the specified liquid to obtain an oral solution.
Oral süspansiyon için konsantr	10100500	Concentrate for oral suspension	Liquid preparation intended to be diluted in the specified liquid to obtain an oral suspension.
Emülsiyonlar		Emulsions	

Mide-bağırsak emülsiyonu	12111000	Gastroenteral emulsion	Liquid preparation consisting of an emulsion intended for administration to the stomach or duodenum by means of a suitable applicator.
Oral damla, emülsiyon	10103000	Oral drops, emulsion	Liquid, usually multidose preparation consisting of an emulsion intended for oral use. The preparation is administered in small volumes by means of a suitable measuring device such as a dropper, pipette or oral syringe capable of accurate dosing of the emulsion. The measured dose may be diluted in water or another suitable liquid before swallowing.
Oral emulsion	10107000	Oral emulsion	Liquid single-dose or multidose preparation consisting of an emulsion intended for oral use. Each dose from a multidose container is administered by means of a device suitable for measuring the prescribed volume, generally 5 mL or multiples thereof.
Sıvılar		Liquids	
Ağız damlası, sıvı	50037750	Oral drops, liquid	Liquid, usually multidose preparation consisting of a liquid active substance per se, intended for oral use. The preparation is administered in small volumes by means of a suitable measuring device such as a dropper, pipette or oral syringe capable of accurate dosing of the liquid. The measured dose may be diluted in water or another suitable liquid before swallowing.
Oral sıvı	10104000	Oral sıvı	Liquid single-dose or multidose preparation consisting of a liquid active substance per se, intended for oral use. Each dose from a multidose container is administered by means of a suitable device such as a measuring spoon.
Süspansiyonlar		Suspensions	
Mide-bağırsak süspansiyonu	12110000	Gastroenteral suspension	Liquid preparation consisting of a suspension intended for administration to the stomach or duodenum by means of a suitable applicator.
Oral / rektal süspansiyon	50038000	Oral/rectal suspension	Liquid preparation consisting of a suspension intended for oral or rectal use.
Oral damla süspansiyon	10102000	Oral drops, suspension	Liquid, usually multidose preparation consisting of a suspension intended for oral use. The preparation is administered in small volumes by means of a suitable measuring device such as a dropper, pipette or oral syringe capable of accurate dosing of the suspension. The measured dose may be diluted in water or another suitable liquid before swallowing.
Oral süspansiyon	10106000	Oral suspension	Liquid single-dose or multidose preparation consisting of a suspension intended for oral use. Each dose from a multidose container is administered by means of a device suitable for measuring the prescribed volume, generally 5 mL or multiples thereof.
Oral süspansiyon için süspansiyon	13037000	Suspension for oral suspension	Liquid preparation consisting of a suspension intended for use in the preparation of an oral suspension.
Şuruplar		Syrups	
Şurup	10117000	Syrup	Liquid single-dose or multidose aqueous preparation characterised by a sweet taste and a viscous consistency and usually containing aromatic or other flavouring agents, intended for oral use. Each dose from a multidose container is administered by means of a device suitable for measuring the prescribed volume, generally 5 mL or multiples thereof.
1.2.1.7 Medikal Gazlar		1.2.1.7 Medicinal gases	
Azot		Nitrogen	
Azot Protoksit		Nitrous oxide	
Karbondioksit		Carbon dioxide	
Kuru Hava		Medicinal air	
Nitrik Oksit		Nitric oxide	
Oksijen		Oxygen	
Sıvı Azot		Liquefied oxygen	
Sıvı Oksijen		Liquefied oxygen	
Kriyojenik tıbbi gaz	12302000	Medicinal gas, cryogenic	a gas which liquifies at 1.013 bar at a temperature below -150 °C.
Sıkıştırılmış tıbbi gaz	12301000	Medicinal gas, compressed	A gas packaged under pressure which is entirely gaseous at - 50
Sıvılaştırılmış tıbbi gaz	12303000	Medicinal gas, liquefied	A gas packaged under pressure, which is partially liquid (gas over liquid) at -50 °C.
1.2.1.8 Diğer Katı Dozaj Şekilleri		1.2.1.8 Other solid dosage forms	
Çaylar		Tea	
Bitkisel çay	10122000	Herbal tea	Solid preparation consisting exclusively of one or more herbal drugs intended for the preparation of an oral aqueous preparation by means of decoction, infusion or maceration. Herbal teas are usually presented in bulk form or in bags. The tea is prepared immediately before oral intake.
Çözünbilir granüle-toz bitkisel çay	10202000	Instant herbal tea	Solid preparation consisting of a lyophilised herbal drug extract intended to be dissolved in water before oral use. Instant herbal teas are supplied in bulk form (multidose) or in sachets (single-dose).
Çubuklar		Sticks	
Burun çubuğu	10812000	Nasal stick	Solid single-dose preparation, usually rod-shaped or conical, intended for nasal use to obtain a local effect.
Deriye uygulama çubuğu	10523000	Cutaneous stick	Solid preparation, usually rod-shaped or conical, intended for application to the skin to obtain a local effect. Cutaneous sticks may consist of the active substance(s) alone or dissolved or dispersed in a suitable basis.
Diş çubuğu	10403000	Dental stick	Solid single-dose preparation, rod-shaped and usually prepared by compression or moulding, intended for dental use.

Kulak çubuğu	10715000	Ear stick	Solid single-dose preparation of usually conical shape intended to be inserted in the external auditory meatus where it melts or dissolves.
Filmler		Films	
Ağızda dağılan film	10236100	Orodispersible film	Solid preparation consisting of a single- or multilayer sheet of suitable material(s) intended to be placed in the mouth where it disperses rapidly before being swallowed.
Dilaltı film	10317500	Sublingual film	Solid preparation consisting of a single- or multilayer sheet of suitable material(s) intended for sublingual use to obtain a systemic effect.
Yanakiçi film	10314011	Buccal film	Solid preparation consisting of a single- or multilayer sheet of suitable material(s) intended to be applied to the buccal cavity (pouch) to obtain a systemic effect.
Flasterler		Plasters	
İlaçlı flaster	10506000	Medicated plaster	Flexible single-dose preparation intended to be applied to the skin to obtain, usually, a local effect. Medicated plasters consist of an adhesive basis containing the active substance and spread as a uniform layer on an appropriate support made of natural or synthetic material. The adhesive layer is covered by a suitable protective liner, which is removed before applying the plaster to the skin. Medicated plasters are presented in a range of sizes or as larger sheets to be cut before use.
Provokasyon testi için flaster	10550000	Plaster for provocation test	Solid flexible preparation containing an allergen product intended for provocation testing by application to the skin.
Granüller		Granules	
Ağız damlası, çözelti granül	50037500	Oral drops, granules for solution	Solid preparation consisting of granules intended to be dissolved in the specified liquid to obtain an oral drops solution.
Ağızdan süspansiyon için efervesan granül	13007000	Effervescent granules for oral suspension	Solid preparation consisting of effervescent granules intended to be dispersed or dissolved in the specified liquid, which is supplied in the same packaging, to obtain an oral suspension. Where the granules are intended to be dispersed in water, the term 'Effervescent granules' is used instead.
Ağızdan/makattan süspansiyon için granül	50029150	Granules for oral/rectal suspension	Solid preparation consisting of granules intended to be dispersed in the specified liquid to obtain an oral/rectal suspension.
Değiştirilmiş salımlı granül	10208000	Modified-release granules	Solid preparation consisting of granules showing a rate and/or place of release different from that of conventional-release granules. This deliberate modification is achieved by a special formulation design and/or manufacturing method. Modified-release granules are usually single-dose preparations intended for oral use, and include prolonged-release, delayed release and pulsatile-release granules. The generic term 'modified-release granules' is used only when the more specific terms 'gastro-resistant granules' or 'prolonged-release granules' do not apply.
Değiştirilmiş salımlı oral süspansiyon granülü	50036000	Modified-release granules for oral suspension	Solid preparation consisting of modified-release granules intended to be dispersed in the specified liquid to obtain an oral suspension.
Efervesan granül	10205000	Effervescent granules	Solid single-dose or multidose preparation consisting of uncoated granules generally containing acidic substances and carbonates or hydrogen carbonates that rapidly react in the presence of water to release carbon dioxide. Effervescent granules are intended to be dissolved or dispersed in water before oral use.
Enterik granül	10206000	Gastro-resistant granules	Solid preparation consisting of delayed-release granules intended to resist the gastric fluid and release the active substance(s) in the intestinal fluid. This deliberate modification is achieved by coating the granules with a gastro-resistant material or by embedding the solid particles in the gastro-resistant material. Gastro-resistant granules are usually single-dose preparations intended for oral use.
Granül	10204000	Granules	Solid single-dose or multidose preparation consisting of solid, dry aggregates of powder particles that are sufficiently resistant to withstand handling. Granules are intended for oral use to release active substance(s) in the gastrointestinal fluids by a rate depending essentially on the intrinsic properties of the active substance(s) (conventional release). They may be swallowed as such and/or chewed before swallowing, and some may also be dissolved or dispersed in water or another suitable liquid before oral administration. Granules for oral solution and Granules for oral suspension are excluded.
Kaplı granül	13046000	Coated granules	Solid preparation intended for oral use, consisting of granules coated with one or more layers of mixtures of various substances that are usually applied as a solution or suspension in conditions in which evaporation of the vehicle occurs. When the coating dissolves or disintegrates any active substance is released into the gastrointestinal fluid at a rate depending essentially on its intrinsic properties (conventional release).
Oral çözelti granülü	10112000	Granules for oral solution	Solid preparation consisting of aggregated particles that may include excipients to facilitate wetting and dissolution, intended to be dissolved in the specified liquid to obtain an oral solution, which is usually prepared just before administration to the patient.
Oral süspansiyon granülü	10113000	Granules for oral suspension	Solid preparation consisting of aggregated particles that may include excipients to facilitate wetting and dispersion, intended to be dispersed in the specified liquid to obtain an oral suspension, which is usually prepared just before administration to the patient.
Oral süspansiyonluk enterik granül	50026000	Gastro-resistant granules for oral suspension	Solid preparation consisting of gastro-resistant granules intended to be dispersed in the specified liquid to obtain an oral suspension.
Rektal süspansiyon için granül	13015000	Granules for rectal suspension	Solid preparation consisting of aggregated particles that may include excipients to facilitate wetting and dispersion, intended to be dispersed in the specified liquid to obtain a rectal suspension, which is usually prepared just before administration to the patient.

Şurup için granül	10119000	Granules for syrup	Solid preparation consisting of aggregated particles that may include excipients to facilitate wetting and dissolution and to obtain the characteristics of a syrup, intended to be dissolved in water to obtain a syrup.
Uzatılmış salımlı granül	10207000	Prolonged-release granules	Solid preparation consisting of granules showing a slower release than that of conventional-release granules. This deliberate modification is achieved by a special formulation design and/or manufacturing method. Prolonged-release granules are usually single-dose preparations intended for oral use.
Uzatılmış salımlı oral süspansiyonluk granül	50056000	Prolonged-release granules for oral suspension	Solid preparation consisting of prolonged-release granules intended to be dispersed in the specified liquid to obtain an oral suspension.
Vajinal çözelti için granül	50029500	Granules for vaginal solution	Solid preparation consisting of aggregated particles that may include excipients to facilitate wetting and dissolution, intended to be dissolved in the specified liquid to obtain a vaginal solution, which is usually prepared just before administration to the patient.
İnsertler		Insert	
Periodontal insert	10411000	Periodontal insert	Solid single-dose preparation consisting of a medicated insert to be placed within the tooth socket/periodontal membrane. The biodegradable insert is a sheet which slowly releases active substance(s).
Kaşeler		Cachets	
Kaşe	10209000	Cachet	Solid discoid preparation consisting of a wafer enclosing a unit dose intended for oral use.
Liyofilizatlar		Lyophilisates	
Oral liyofilizat	10224000	Oral lyophilisate	Solid single-dose preparation made by freeze-drying of a liquid or semi-solid preparation. This fast-releasing preparation is intended to be placed in the mouth where its contents are released in saliva and swallowed or, alternatively, to be dissolved in water before oral administration.
Pastiller		Pastilles	
Pastil	10321000/ 10322000	Lozenge/Pastille	Lozenge: Solid single-dose preparation intended to be sucked to obtain, usually, a local effect in the oral cavity and the throat. Lozenges are hard preparations prepared by moulding. They usually contain flavouring and sweetening agents. Lozenges dissolve or disintegrate slowly when sucked. Pastille: Solid single-dose preparation intended to be sucked to obtain, usually, a local effect in the oral cavity and the throat. Pastilles are soft, flexible preparations prepared by moulding of mixtures containing natural or synthetic polymers or gums and sweeteners. They dissolve or disintegrate slowly when sucked.
Tablet pastil	10322000	Compressed lozenge	Solid single-dose preparation intended to be sucked to obtain a local or systemic effect. It is prepared by compression and is often rhomboid in shape. Compressed lozenges usually contain flavouring and sweetening agents. They dissolve or disintegrate slowly when sucked.
Pilüller		Pillules	
Pilül	10231000	Pillules	Solid preparation for homoeopathic use, obtained from sucrose, lactose or other suitable excipients. Pillules may be prepared by impregnation of preformed pillules with a dilution or dilutions of homoeopathic stocks or by progressive addition of these excipients and the addition of a dilution or dilutions of homoeopathic stocks. Pillules are intended for oral or sublingual
Tozlar		Powders	
Ağız damlası, süspansiyonluk toz	50082000	Oral drops, powder for suspension	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain an oral drops suspension.
Ağız yıkama, çözelti toz	50036050	Mouthwash, powder for solution	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a mouthwash.
Rahim ağız kanalı jeli için toz	13024000	Powder for endocervical gel	Solid preparation consisting of one or more powders intended to be mixed with the specified liquid or gel to obtain an endocervical gel.
Burun damlası, çözelti toz	13020000	Nasal drops, powder for solution	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a nasal drops solution.
Burun tozu	10807000	Nasal powder	Solid, usually multidose preparation consisting of one or more powders of solid active substance(s) intended for nasal use by insufflation into the nasal cavity.
Buruna püskürtücü, çözelti toz	50037100	Nasal spray, powder for solution	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a nasal spray solution.
Deri çözeltisi için toz	10514500	Powder for cutaneous solution	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a cutaneous solution.
Deri spreyi, toz	10511000	Cutaneous spray, powder	Solid, usually multidose preparation presented in a pressurised container with a spray valve or in a container equipped with a spray pump. The spray is intended for cutaneous use.
Deri tozu	10517000	Cutaneous powder	Solid, usually multidose preparation consisting of a powder intended for cutaneous use. Cutaneous spray, powder is excluded.
Dilaltı toz	13105000	Sublingual powder	Solid preparation consisting of a powder intended for sublingual use.
Diş çözeltisi için toz	50049270	Powder for dental solution	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a dental solution.
Diş dolgu maddesi için toz	10413000	Powder for dental cement	Solid preparation consisting of one or more powders, including freeze-dried powders, intended for use in the preparation of a dental cement.
Diş jeli için toz	13022000	Powder for dental gel	Solid preparation consisting of one or more powders intended to be mixed with the specified liquid or gel to obtain a dental gel.
Diş tozu	10405000	Dental powder	Solid preparation consisting of one or more powders intended for administration on teeth and gums.

Dışeti jeli için toz	13026000	Powder for gingival gel	Solid preparation consisting of one or more powders intended to be mixed with the specified liquid or gel to obtain a gingival gel.
Efervesan toz	10203000	Effervescent powder	Solid single-dose or multidose preparation consisting of one or more powders generally containing acid substances and carbonates or hydrogen carbonates that react rapidly in the presence of water to release carbon dioxide. Effervescent powders are intended to be dissolved or dispersed in water before administration.
Endotrakeopulmoner damlatma çözeltisi tozu	11602000	Endotracheopulmonary instillation, powder for solution	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain an endotracheopulmonary instillation solution.
Endotrakeopulmoner süspansiyonluk için damlatma, toz	13009000	Endotracheopulmonary instillation, powder for suspension	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain an endotracheopulmonary instillation suspension.
Gargara, çözelti tozu	10303000	Gargle, powder for solution	Solid preparation consisting of one or more powders intended to be dissolved in water to obtain a gargle.
İnhalasyon buharı, toz	11112000	Inhalation vapour, powder	Solid preparation consisting of one or more powders of solid active substance(s) intended for generation of vapour to be inhaled to obtain a local effect. The vapour is usually generated by adding the powder to hot water.
İnhalasyon için toz	11109000	Inhalation powder	Solid, usually multidose preparation intended for inhalation use, consisting of one or more powders of solid active substance(s) to be administered by a dry-powder inhaler containing a metering dose mechanism within the inhaler. 'Inhalation powder, hard capsule' and 'Inhalation powder, pre-dispensed' are excluded.
İyontoforez için çözelti toz	10518500	Powder for solution for iontophoresis	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a solution for iontophoresis.
Jel için toz	13021000	Powder for gel	Solid preparation consisting of one or more powders intended to be mixed with the specified liquid or gel to obtain a gel (for cutaneous use).
Kulak damlası, süspansiyonluk toz	13006000	Ear drops, powder for suspension	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain an ear drops suspension.
Kulak tozu	10708000	Ear powder	Solid, usually multidose preparation consisting of one or more powders consisting of (a) solid active substance(s) intended for application to the external auditory meatus. Ear powders are presented in containers fitted with a suitable applicator or device for insufflation.
Nebulizör çözeltisi için toz	11104000	Powder for nebuliser solution	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a nebuliser solution.
Nebulizör süspansiyonu için toz	11103000	Powder for nebuliser suspension	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a nebuliser suspension.
Oral / rektal süspansiyon tozu	50052000	Powder for oral/rectal suspension	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain an oral/rectal solution.
Oral çözelti tozu	10110000	Powder for oral solution	Solid preparation consisting of (a) solid active substance(s) which may also include excipients to facilitate dissolution in the prescribed liquid. Powders for oral solution include freeze-dried powders. The oral solution is usually prepared just before administration to the patient.
Oral süspansiyon tozu	10111000	Powder for oral suspension	Solid preparation consisting of (a) solid active substance(s) which may also include excipients to facilitate dispersion in the prescribed liquid and to prevent sedimentation during storage of the oral suspension. Powders for oral suspension include freeze-dried powders. The oral suspension is usually prepared just before administration to the patient.
Oral toz	10201000	Oral powder	Single-dose or multidose preparation consisting of one or more particulate solids of varying degrees of fineness. Oral powders are intended for oral administration. They are generally administered in or with water or another suitable liquid, but may also be swallowed directly.
Periodontal toz	10401000	Periodontal powder	Solid preparation consisting of one or more powders intended for administration within the tooth socket/periodontal membrane.
Rektal çözelti tozu	11009000	Powder for rectal solution	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain a rectal solution.
Rektal süspansiyon tozu	11010000	Powder for rectal suspension	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain a rectal suspension.
Sert kapsülde inhalasyon tozu	11110000	Inhalation powder, hard capsule	Solid single-dose preparation intended for inhalation use, consisting of one or more powders of solid active substance(s) enclosed in a hard capsule. The capsule is loaded into a dry-powder inhaler to generate an aerosol.
Sinüsiçi çözelti toz	13025000	Powder for endosinusal solution	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain an endosinusal solution.
Şurup için toz	10118000	Powder for syrup	Solid preparation consisting of one or more powders, including freeze-dried powders, that may include excipients to facilitate dissolution in water and to obtain the characteristics of a syrup, intended to be dissolved in water to obtain a syrup.
Tek dozluk inhalasyon tozu	11111000	Inhalation powder, pre-dispensed	Solid preparation intended for inhalation use, consisting of one or more powders of solid active substance(s) presented in a suitable pharmaceutical form other than a hard capsule, either in the form of a single dose or divided into multiple single doses. The preparation is loaded into a dry-powder inhaler to generate an aerosol.
Vezikül içi çözeltisi tozu	50050000	Powder for intravesical solution	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dissolved in the specified liquid to obtain an intravesical solution
Vezikül içi süspansiyon tozu	50051000	Powder for intravesical suspension	Solid preparation consisting of one or more powders, including freeze-dried powders, intended to be dispersed in the specified liquid to obtain an intravesical suspension.
Banyo katığı	10501000	Bath additive	Solid, semi-solid or liquid preparation to be added to the bath water.

Kese	300475000	Pouch	Small bag made of a suitable material containing a single dose of a medicinal product, to be placed in a cavity of the body for release of the active substance(s)
Pellet		Pellet	
Mikropellet		Mikropellet	
1.2.1.9 Basınçlı Ürünler		1.2.1.9 Pressurised preparations	
1.2.1.10 Radyonüklit Jeneratörler		1.2.1.10 Radionuclide generators	
Radyonüklit jeneratör	12106000	Radionuclide generator	A system incorporating a fixed parent radionuclide from which is produced a daughter radionuclide which is to be removed by elution or by any other method and used in a radiopharmaceutical.
1.2.1.11 Yarı Katılar		1.2.1.11 Semi-solids	
Kremler		Creams	
		Oromucosal cream	Semi-solid, usually multidose preparation consisting of an oil-in-water emulsion intended for oromucosal use. Oromucosal creams are applied to the oral cavity or onto a specific part of the oral cavity, other than the gingivae, to obtain a local effect.
Ağız mukoza kremi	10314010		
		Nasal cream	
Burun kremi	10801000		Semi-solid single-dose or multidose preparation consisting of a cream, usually of oil-in-water type, intended for nasal use to obtain a local effect. Nasal creams are usually presented in tubes fitted with a nasal applicator.
		Cream	Semi-solid single-dose or multidose preparation of homogeneous appearance consisting of a lipophilic phase and an aqueous phase, one of which is finely dispersed in the other. Active substance(s) are dissolved or dispersed in the basis, which may be hydrophilic or hydrophobic. Creams are intended for cutaneous use. In certain cases, transdermal delivery may be obtained.
Krem	10502000		
		Ear cream	Semi-solid single-dose or multidose preparation consisting of a cream intended for application to the external auditory meatus, if necessary by means of a tampon impregnated with the preparation.
Kulak kremi	10701000		
		Rectal cream	Semi-solid preparation consisting of a cream usually presented in a single-dose container provided with a suitable applicator, intended for rectal use to obtain a local effect.
Rektal krem	11001000		
		Vaginal cream	Semi-solid preparation consisting of a cream usually presented in a single-dose container provided with a suitable applicator, intended for vaginal use to obtain a local effect.
Vajinal krem	10901000		
Jeller		Gels	
		Oromucosal gel	Semi-solid single-dose or multidose preparation consisting of a hydrophilic gel intended for oromucosal use. It is applied to the oral cavity or onto a specific part of the oral cavity, to obtain a local effect. Gingival gel is excluded.
Ağız mukoza jeli	10313000		
		Nasal gel	Semi-solid single-dose or multidose preparation consisting of usually a hydrophilic gel, intended for nasal use to obtain a local effect. Nasal gels are usually presented in tubes fitted with a nasal applicator.
Burun jeli	10802000		
		Dental gel	Semi-solid, usually multidose preparation consisting of a hydrophilic gel intended for administration on teeth and gums by rubbing.
Diş jeli	10402000		
		Gingival gel	Semi-solid single-dose or multidose preparation consisting of a gel intended for gingival use to obtain a local effect.
Dişeti jeli	10315000		
İntestinal jel	12120000	Intestinal gel	Semi-solid preparation consisting of a gel intended for intestinal use.
		Gel	Semi-solid single-dose or multidose preparation consisting of a single-phase basis of liquids gelled by a suitable gelling agent, intended for cutaneous use. Active substance(s) are dissolved or dispersed in the basis, which may be hydrophilic or hydrophobic.
Jel	10503000		
		Gel for gel	Semi-solid preparation consisting of a gel intended for use in the preparation of a gel for cutaneous use.
Jellik jel	13014000		
		Ear gel	Semi-solid single-dose or multidose preparation consisting of a gel intended for application to the external auditory meatus, if necessary by means of a tampon impregnated with the preparation.
Kulak jeli	10702000		
		Oral gel	Semi-solid single-dose or multidose preparation intended for oral use, consisting of a gel, usually hydrophilic, to be swallowed after administration to the oral cavity.
Oral jel	10108000		
		Periodontal gel	Semi-solid preparation consisting of a gel intended to be placed in the pouch between the tooth and the gingiva.
Periodontal jel	10410000		
		Endocervical gel	Semi-solid preparation consisting of a gel intended for endocervical use by means of a suitable applicator.
Rahim ağız kanalı jeli	11701000		
		Rectal gel	Semi-solid preparation consisting of a gel usually presented in a single-dose container provided with a suitable applicator, intended for rectal use to obtain a local effect.
Rektal Jel	11002000		
		Transdermal gel	Semi-solid single-dose or multidose preparation consisting of a single-phase basis of liquids gelled by a suitable gelling agent. Active substance(s) is (are) dissolved or dispersed in the basis, which may be hydrophilic or hydrophobic. Transdermal gels are intended for transdermal use.
Transdermal jel	10546250		
		Vaginal gel	Semi-solid preparation consisting of a gel usually presented in a single-dose container provided with a suitable applicator, intended for vaginal use to obtain a local effect.
Vajinal jel	10902000		
Merhemler		Ointments	
		Oromucosal ointment	Semi-solid multidose preparation consisting of an ointment intended for oromucosal use. It is applied to the oral cavity or onto a specific part of the oral cavity, to obtain a local effect
Ağız mukozası merhemi	10314005		
		Nasal ointment	Semi-solid single-dose or multidose preparation consisting of an ointment, intended for nasal use to obtain a local effect. Nasal ointments are usually presented in tubes fitted with a nasal applicator.
Burun merhemi	10803000		

Deri spreyi, merhem	50016000	Cutaneous spray, ointment	Ointment formed at the time of administration from a liquid preparation in a pressurised container with a spray valve or in a container equipped with a spray pump.
Deri/burun merhemi	50015200	Cutaneous/nasal ointment	Semi-solid preparation consisting of an ointment intended for cutaneous or nasal use.
Inhalasyon buharı, merhem	11116000	Inhalation vapour, ointment	Semi-solid preparation consisting of an ointment intended for generation of vapour to be inhaled to obtain a local effect. The vapour may be generated by adding the ointment to hot water.
Kulak merhemi	10703000	Ear ointment	Semi-solid single-dose or multidose preparation consisting of an ointment intended for application to the external auditory meatus, if necessary by means of a tampon impregnated with the preparation.
Merhem	10504000	Ointment	Semi-solid single-dose or multidose preparation consisting of a single-phase basis in which solids or liquids may be dispersed. Active substance(s) are dissolved or dispersed in the basis, which may be hydrophilic, hydrophobic or water-emulsifying. Ointments are intended for cutaneous use. In certain cases, transdermal delivery may be obtained.
Rektal merhem	11003000	Rectal ointment	Semi-solid preparation consisting of an ointment usually presented in a single-dose container provided with a suitable applicator, intended for rectal use to obtain a local effect.
Transdermal merhem	13102000	Transdermal ointment	Semi-solid single-dose or multidose preparation consisting of a single-phase basis in which solids or liquids may be dispersed. Active substance(s) are dissolved or dispersed in the basis, which may be hydrophilic, hydrophobic or water-emulsifying. Transdermal ointments are intended for transdermal use.
Vajinal merhem	10903000	Vaginal ointment	Semi-solid preparation consisting of an ointment usually presented in a single-dose container provided with a suitable applicator, intended for vaginal use to obtain a local effect.
Patlar		Pastes	
Ağız mukoza patı	10314000	Oromucosal paste	Semi-solid single-dose or multidose preparation consisting of a paste of solid particles finely dispersed in a hydrophilic basis intended for oromucosal use. Oromucosal pastes are applied to the oral cavity or onto a specific part of the oral cavity, to obtain a local effect. Gingival paste is excluded.
Deri patı	10505000	Cutaneous paste	Semi-solid single-dose or multidose preparation containing a large proportion of finely divided solids dispersed in the basis, intended for cutaneous use.
Diş macunu	10409000	Toothpaste	Semi-solid, usually multidose preparation consisting of a hydrophilic paste intended to be rubbed onto the teeth.
Diş patı	50017000	Dental paste	Semi-solid single-dose or multidose preparation consisting of solid particles finely dispersed in a suitable basis, intended for administration on or inside the tooth or on and/or around the nerves supplying the teeth. Toothpaste is excluded.
Dişeti patı	10316000	Gingival paste	Semi-solid single-dose or multidose preparation consisting of a paste of solid particles finely dispersed in a hydrophilic basis intended for gingival use to obtain a local effect.
Oral pat	10109000	Oral paste	Semi-solid single-dose or multidose preparation intended for oral use, consisting of a paste to be swallowed after administration to the oral cavity.
Köpükler		Foams	
Deri köpüğü	10507000	Cutaneous foam	Liquid, usually multidose preparation, usually presented in a pressurised container equipped with an applicator suitable for delivery of a foam consisting of large volumes of gas dispersed in a liquid containing active substance(s). Cutaneous foams are intended for cutaneous use.
Rektal köpük	11004000	Rectal foam	Liquid preparation, usually presented in a pressurised container provided with an applicator suitable for delivery to the rectum of foam containing large volumes of gas dispersed in a liquid containing the active substance. Rectal foams are intended for a local effect.
Vajinal köpük	10904000	Vaginal foam	Liquid preparation, usually presented in a pressurised container provided with an applicator suitable for delivery to the vagina of foam containing large volumes of gas dispersed in a liquid containing active substance(s). Vaginal foams are intended for vaginal use, for example for contraception.
Lapalar		Poultice	
Lapa	10522000	Poultice	Semi-solid preparation consisting of a hydrophilic heat-retentive basis in which solid or liquid active substance(s) are dispersed, usually intended to be spread thickly on a suitable dressing and heated before application to the skin.
Banyo katığı	10501000	Bath additive	Solid, semi-solid or liquid preparation to be added to the bath water.
Diş dolgu maddesi	10401500	Dental cement	Semi-solid preparation intended for application in or on teeth, which subsequently hardens to form a seal or bond.
1.2.1.12 Süpozituarlar		1.2.1.12 Suppositories	
Ovül	10909000	Pessary	Solid, single-dose preparation usually prepared by moulding, of various shapes, usually ovoid, with a volume and consistency suitable for insertion into the vagina to obtain a local effect. It contains one or more active substances dispersed or dissolved in a suitable basis that may be soluble or dispersible in water or may melt at body temperature.
Süpozituar	11013000	Suppository	Solid single-dose preparation of a shape, size and consistency suitable for rectal use, containing active substance(s) dispersed or dissolved in a suitable basis that may be soluble or dispersible in water or may melt at body temperature.
1.2.1.13 Tabletler		1.2.1.13 Tablets	
Ağız çalkalama çözelti tableti	10311000	Mouthwash, tablet for solution	Solid preparation consisting of an uncoated tablet intended to be dissolved in water to obtain a mouthwash.

Ağızda dağılan tablet	10223000	Orodispersible tablet	Solid single-dose preparation consisting of an uncoated tablet intended to be placed in the mouth where it disperses rapidly in saliva before being swallowed.
Bukkal tablet	10320000	Buccal tablet	Solid single-dose preparation to be applied to the buccal cavity (pouch) to obtain systemic delivery. Buccal tablets are prepared by compression of mixtures of powders or granulations into tablets with a shape suited for the intended use.
Çiğneme tableti	10228000	Chewable tablet	Solid single-dose preparation consisting of an uncoated tablet intended to be chewed before being swallowed. Chewable tablets are intended for oral administration.
Çiğnenebilir / dağılılabılır tablet	50001000	Chewable/dispersible tablet	Solid single-dose preparation consisting of an uncoated tablet intended either to be chewed before being swallowed, or to be dispersed in the specified liquid before being swallowed.
Çözünebilir tablet	10120000	Soluble tablet	Solid single-dose preparation consisting of a tablet, usually uncoated, intended to be dissolved in the specified liquid before being swallowed.
Değiştirilmiş salımlı tablet	10227000	Modified-release tablet	Solid single-dose preparation consisting of a tablet showing a rate, a place and/or a time of release different from that of a conventional-release tablet. This deliberate modification is achieved by a special formulation design and/or manufacturing method. Modified-release tablets are intended for oral use, and include prolonged-release, delayed-release and pulsatile-release preparations. The generic term 'modified-release tablet' is used only when the more specific terms 'gastro-resistant tablet' or 'prolonged-release tablet' do not apply.
Deri çözeltili için tablet	13066000	Tablet for cutaneous solution	Solid, usually single-dose preparation consisting of a tablet, usually uncoated, intended to be dissolved in the specified liquid to obtain a cutaneous solution.
Dilaltı tablet	10318000	Sublingual tablet	Solid single-dose preparation consisting of an uncoated tablet intended for sublingual use. Sublingual tablets are usually prepared by compression of mixtures of powders or granulations into tablets with a shape suited for the intended use. Other technologies such as moulding may be used.
Doz dağıtımlı dağılılabılır tablet	10121500	Dispersible tablets for dose dispenser	Solid preparation consisting of small, dispersible tablets that are designed to be used in a dose dispenser, each tablet usually consisting of a small fraction of a dose, with multiple tablets being automatically counted and administered as a single dose.
Efervesan tablet	10222000	Effervescent tablet	Solid single-dose preparation consisting of an uncoated tablet generally containing acid substances and carbonates or hydrogen carbonates, which react rapidly in the presence of water to release carbon dioxide. Effervescent tablets are intended to be dissolved or dispersed in water before oral use.
Efervesan vajinal tablet	10913000	Effervescent vaginal tablet	Solid single-dose preparation consisting of a vaginal tablet usually containing acid substances and carbonates or hydrogen carbonates that react rapidly in the presence of aqueous liquid to release carbon dioxide.
Enterik tablet	10225000	Gastro-resistant tablet	Solid single-dose, delayed-release tablet intended to resist the gastric fluid and to release the active substance(s) in the intestinal fluid. These properties are achieved by coating the tablet with a gastro-resistant material or by embedding solid particles in the gastro-resistant material before compression. Gastro-resistant tablets are intended for oral administration.
Film kaplı tablet	10221000	Film-coated tablet	Solid single-dose preparation consisting of a tablet coated with a thin polymeric film that dissolves within a few minutes in the gastrointestinal fluid. Film-coated tablets are intended for oral use to release active substance(s) at a rate which is not significantly delayed compared to that of the uncoated tablet.
Gargara, çözelti tableti	10304000	Gargle, tablet for solution	Solid preparation consisting of a tablet intended to be dissolved in water to obtain a gargle.
İnhalasyon buharı, tablet	11115000	Inhalation vapour, tablet	Solid preparation consisting of a tablet intended for generation of vapour to be inhaled to obtain a local effect. The vapour is usually generated by adding the tablet to hot water.
İnhalasyon buharı, efervesan tablet	50031000	Inhalation vapour, effervescent tablet	Solid preparation consisting of a tablet usually containing acid substances and carbonates or hydrogen carbonates that react rapidly in the presence of aqueous liquid to release carbon dioxide, intended for generation of vapour to be inhaled to obtain a local effect. The vapour may be generated by adding the tablet to hot water.
İnhalasyon tozu, tablet	50030000	Inhalation powder, tablet	Solid multidose preparation intended for inhalation use. The dose of inhalation powder is generated from the tablet by a metering mechanism within the inhaler, for example by scraping off a small amount of powder from the tablet.
Kaplanmış Tablet	10220000	Coated tablet	Solid single-dose preparation consisting of a tablet coated with one or more layers of mixtures of various substances such as sugars and waxes. To the coating colouring matter, flavouring substances and active substance(s) may be added. The thickness of the coating is greater than that of a film-coated tablet. Coated tablets have a smooth surface. They are intended for oral use. When the coating dissolves or disintegrates the active substance(s) is (are) released into the gastrointestinal fluid at a rate depending essentially on its intrinsic properties (conventional release).
Mukozaya yapışan ağız içi tableti	10319000	Muco-adhesive buccal tablet	Solid single-dose preparation to be applied to the buccal mucosa to obtain a systemic delivery over an extended period of time. Mucoadhesive buccal tablets are usually prepared by compression of mixtures of powders or granulations into tablets with a shape suited for the intended use. They usually contain hydrophilic polymers, which on wetting with saliva produce a flexible hydrogel that adheres to the buccal mucosa.
Rektal çözelti tableti	11011000	Tablet for rectal solution	Solid, usually single-dose preparation consisting of a tablet, usually uncoated, intended to be dissolved in the specified liquid to obtain a rectal solution.
Rektal süspansiyon tableti	11012000	Tablet for rectal suspension	Solid, usually single-dose preparation consisting of a tablet, usually uncoated, intended to be dispersed in the specified liquid to obtain a rectal suspension.
Süspansiyonluk tablet	10121000	Dispersible tablet	Solid single-dose preparation consisting of a tablet intended to be dispersed in the specified liquid before being swallowed.

Tablet	10219000	Tablet	Solid single-dose uncoated preparation obtained by compressing uniform volumes of particulate solids or by other means such as extrusion or moulding. Tablets include single-layer tablets resulting from a single compression of particles and multi-layer tablets consisting of concentric or parallel layers obtained by successive compressions of particles of different composition. Tablets are intended for oral use to release active substance(s) in the gastrointestinal fluids by a rate depending essentially on the intrinsic properties of active substance(s) (conventional release).
Uzatılmış salımlı tablet	10226000	Prolonged-release tablet	Solid single-dose preparation consisting of a tablet showing a slower release of the active substance(s) than that of a conventional-release tablet. Prolonged release is achieved by a special formulation design and/or manufacturing method. Prolonged-release tablets are intended for oral use.
Vajinal çözelti tableti	10908000	Tablet for vaginal solution	Solid, usually single-dose preparation consisting of a tablet, usually uncoated, intended to be dissolved in the specified liquid to obtain a vaginal solution.
Vajinal tablet	10912000	Vaginal tablet	Solid single-dose preparation consisting of a tablet, usually uncoated or film-coated, intended for administration to the vagina to obtain a local effect. Vaginal tablets are usually of larger size and a different shape from tablets intended for oral administration.
1.2.1.14 Transdermal Yamalar		1.2.1.14 Transdermal patches	
Ağız mukozası flasteri	50039000	Oromucosal patch	Flexible single-dose preparation intended to be applied to the oral cavity to obtain either a systemic or a local effect by delivering the active substance(s) over a certain period of time, after which it is then removed.
Deri yaması	10517500	Cutaneous patch	Flexible single-dose preparation intended to be applied to the unbroken skin to obtain a local effect by penetration of the active substance(s) into the skin.
Transdermal flaster	10519000	Transdermal patch	Flexible single-dose preparation intended to be applied to the unbroken skin to obtain a systemic delivery over an extended period of time. Transdermal patches consist of a backing sheet supporting a reservoir or a matrix containing the active substance(s) and on the top a pressure-sensitive adhesive, which assures the adhesion of the preparation to the skin. The backing sheet is impermeable to the active substance(s) and normally impermeable to water. In reservoir systems the active substance may be dissolved or dispersed in a semi-solid basis or in a solid polymer matrix, which is separated from the skin by a rate-controlling membrane. The pressure-sensitive adhesive may, in this case, be applied to some or all parts of the membrane, or only around the border of the membrane and the backing sheet. Matrix systems contain the active substance in a solid or semi-solid matrix, the properties of which control the diffusion pattern to the skin. The matrix system may also be a solution or dispersion of the active substance in the pressure-sensitive adhesive. The releasing surface of the patch is covered by a protective liner to be removed before applying the patch to the skin.
1.2.1.15 Diğer Steril Olmayan Ürünler (Açıklama giriniz.)		1.2.1.15 Other (...clarify)	
Ağızdan çözelti için şaşede granül	50029170	Granules for oral solution in sachet	Medicinal product consisting of granules for oral solution presented in a sachet.
Ağızdan süspansiyon için granül ve çözücü	50026500	Granules and solvent for oral suspension	Granules and solvent intended for the preparation of an oral suspension by dispersing the granules in the solvent.
Ağızdan süspansiyon için şaşede granül	50029200	Granules for oral suspension in sachet	Medicinal product consisting of granules for oral suspension presented in a sachet.
Basınçlı kapta jel	50026400	Gel in pressurised container	Medicinal product consisting of a gel presented in a pressurised container.
Burun damlası, çözelti için toz ve çözücü	50047650	Nasal drops, powder and solvent for solution	Powder (including freeze-dried powder) and solvent intended for the preparation of nasal drops, solution, by dissolving the powder in the solvent.
Burun damlası, tek dozluk kapta çözelti	50036200	Nasal drops, solution in single-dose container	Medicinal product consisting of a nasal drops solution presented in a single-dose container.
Buruna püskürtücü, tek dozluk kapta çözelti	50037250	Nasal spray, solution in single-dose container	Medicinal product consisting of a nasal spray solution presented in a single-dose container.
Deri çözümlü konsantre ve çözücüsü	50003000	Concentrate and solvent for cutaneous solution	Concentrate and solvent intended for the preparation of a cutaneous solution by diluting the concentrate with the solvent.
Deri çözümlü tozu ve çözücüsü	50044000	Powder and solvent for cutaneous solution	Powder (including freeze-dried powder) and solvent intended for the preparation of a cutaneous solution by dissolving the powder in the solvent.
Deri çözümlü, tek dozluk kapta	13103000	Cutaneous solution in single-dose container	Medicinal product consisting of a cutaneous solution presented in a single-dose container.
Diş dolgu maddesi için toz ve çözelti	10412000	Powder and solution for dental cement	Powder (including freeze-dried powder) and solution, both containing active substance(s), intended for the preparation of a dental cement by mixing the powder and the solution.
Diş eti jeli tozu ve çözücüsü	50046000	Powder and solvent for gingival gel	Powder (including freeze-dried powder) and solvent intended for the preparation of a gingival gel by mixing the powder and the solvent.
Diş jeli tozu ve çözücüsü	50071000	Powder and solvent for dental gel	Powder (including freeze-dried powder) and solvent intended for the preparation of a dental gel by mixing the powder and the solvent.
Endotrakeopulmoner damlatma tozu ve çözücüsü	11604000	Endotracheopulmonary instillation, powder and solvent for solution	Powder (including freeze-dried powder) and aqueous solvent intended for the preparation of an endotracheopulmonary instillation solution by dissolving the powder in the solvent.
Endotrakeopulmoner süspansiyonluk için damlatma, toz ve çözücü	11605000	Endotracheopulmonary instillation, powder and solvent for suspension	Powder (including freeze-dried powder) and aqueous solvent intended for the preparation of an endotracheopulmonary instillation suspension by dispersing the powder in the solvent.
Kesede ağız mukozası tozu	50039300	Oromucosal powder in pouch	Medicinal product consisting of an oromucosal powder presented in a pouch.
Kulak damlası, süspansiyonluk toz ve çözücüsü	10707000	Ear drops, powder and solvent for suspension	Powder (including freeze-dried powder) and solvent intended for the preparation of ear drops, suspension, by dispersing the powder in the solvent.
Kulak damlası, tek dozluk kapta çözelti	50017200	Ear drops, solution in single-dose container	Medicinal product consisting of an ear drops solution presented in a single-dose container.
Kulak damlası, tek dozluk kapta süspansiyon	50017500	Ear drops, suspension in single-dose container	Medicinal product consisting of an ear drops suspension presented in a single-dose container.
Kullanıma hazır ağızdan uygulayıcıda süspansiyon	13075000	Oral suspension in pre-filled oral applicator	Medicinal product consisting of an oral suspension presented in a pre-filled oral applicator.

Mesaneiçi çözeltisi için toz ve çözücü	50047500	Powder and solvent for intravesical solution	Powder (including freeze-dried powder) and solvent intended for the preparation of an intravesical solution by dissolving the powder in the solvent.
Mesaneiçi süspansiyonu için toz ve çözücü	50047600	Powder and solvent for intravesical suspension	Powder (including freeze-dried powder) and solvent intended for the preparation of an intravesical suspension by dispersing the powder in the solvent.
Nebülizör çözelti için toz ve çözücü	50047700	Powder and solvent for nebuliser solution	Powder (including freeze-dried powder) and solvent intended for the preparation of a nebuliser solution by dissolving the powder in the solvent.
Oral çözelti tableti ve tozu	50065000	Tablet and powder for oral solution	Tablet and powder, both containing active substance(s), intended for the preparation of an oral solution by dissolving the tablet and the powder in the specified liquid.
Oral çözelti tozu ve çözücüsü	10114000	Powder and solvent for oral solution	Powder (including freeze-dried powder) and solvent intended for the preparation of an oral solution by dissolving the powder in the solvent.
Oral süspansiyon tozu ve çözücüsü	10115000	Powder and solvent for oral suspension	Powder (including freeze-dried powder) and solvent intended for the preparation of an oral suspension by dispersing the powder in the solvent.
Oral süspansiyonluk efervesan granül ve süspansiyon	50062000	Suspension and effervescent granules for oral suspension	Suspension and effervescent granules, both containing active ingredients, intended for the preparation of an oral suspension by dissolving or dispersing the granules in the suspension.
Pilül, tek dozluk kap	50041000	Pillules in single-dose container	Medicinal product consisting of pillules presented in a single-dose container.
Püskürtücü için süspansiyon ve çözelti	50062500	Suspension and solution for spray	Suspension and solution for spray
Rahim ağız kanalı jeli için toz ve çözücü	11702000	Powder and solvent for endocervical gel	Powder (including freeze-dried powder) and solvent intended for the preparation of an endocervical gel by mixing the powder and the solvent.
Rahim içi uygulama sistemi	11901000	Intrauterine delivery system	Solid single-dose delivery system intended for intrauterine use that releases its contents of active substance(s) over an extended period of time.
Rektal süspansiyonluk tablet ve çözücüsü	50064000	Tablet and solvent for rectal suspension	Tablet and solvent intended for the preparation of a rectal suspension by dispersing the tablet in the solvent.
Saşede ağızdan çözelti	50038600	Oral solution in sachet	Medicinal product consisting of an oral solution presented in a sachet.
Saşede ağızdan çözelti toz	50052500	Powder for oral solution in sachet	Medicinal product consisting of a powder for oral solution presented in a sachet.
Saşede ağızdan emülsiyon	50037600	Oral emulsion in sachet	Medicinal product consisting of an oral emulsion presented in a sachet.
Saşede ağızdan pat	50037700	Oral paste in sachet	Medicinal product consisting of an oral paste presented in a sachet.
Saşede ağızdan süspansiyon	50038700	Oral suspension in sachet	Medicinal product consisting of an oral suspension presented in a sachet.
Saşede ağızdan süspansiyonluk midede dayanıklı granül	50026150	Gastro-resistant granules for oral suspension in sachet	Medicinal product consisting of gastro-resistant granules for oral suspension presented in a sachet.
Saşede ağızdan süspansiyonluk uzatılmış salımlı granül	50056150	Prolonged-release granules for oral suspension in sachet	Medicinal product consisting of prolonged-release granules for oral suspension presented in a sachet.
Saşede ağızdan toz	50037800	Oral powder in sachet	Medicinal product consisting of an oral powder presented in a sachet.
Saşede ağızdan/makattan süspansiyonluk toz	13060000	Powder for oral/rectal suspension in sachet	Medicinal product consisting of a powder for oral/rectal suspension presented in a sachet.
Saşede granül	50029550	Granules in sachet	Medicinal product consisting of granules presented in a sachet, the entire contents of which are intended for oral administration as a single dose. For reasons of patient safety and to ensure the correct administration of the medicinal product, this term may also be used where the contents are in fact very small tablets rather than granules, and where the entire contents of the sachet are intended for oral administration as a single dose, rather than the tablets being individually counted out at the time of administration.
Saşede jel	13069000	Gel in sachet	Medicinal product consisting of a gel presented in a sachet.
Saşede kaplı granül	50001250	Coated granules in sachet	Medicinal product consisting of coated granules presented in a sachet.
Saşede midede dayanıklı granül ve film kaplı tablet	50023700	Film-coated tablet and gastro-resistant granules in sachet	Medicinal product consisting of a film-coated tablet and gastro-resistant granules presented together in a sachet and intended to be swallowed together as a single dose. If two or more tablets are present to make up the dose, the term 'Film-coated tablets and gastro-resistant granules in sachet' is used.
Saşede şurup	13094000	Syrup in sachet	Medicinal product consisting of a syrup in a sachet.
Saşede uzatılmış salımlı granül	50056200	Prolonged-release granules in sachet	Medicinal product consisting of prolonged-release granules presented in a sachet.
Sinüs içi çözeltisi tozu ve çözücüsü	50045000	Powder and solvent for endosinusal solution	Powder (including freeze-dried powder) and solvent intended for the preparation of an endosinusal solution by dissolving the powder in the solvent.
Şurup için toz ve çözücü	10115500	Powder and solvent for syrup	Powder (including freeze-dried powder) and solvent intended for the preparation of a syrup by dissolving the powder in the solvent.
Tek dozluk kapta ağızdan çözelti	50038650	Oral solution in single-dose container	Medicinal product consisting of an oral solution presented in a single-dose container.
Tek dozluk kapta granül	13090000	Granules in single-dose container	Medicinal product consisting of granules presented in a single-dose container.
Torba çay	50029700	Herbal tea in bag	Medicinal product consisting of a herbal tea enclosed in a porous bag (a tea bag) intended to be placed in water for the preparation of an oral aqueous preparation on one occasion only.
Toz ve jellik jel	50041200	Powder and gel for gel	Powder and gel intended for the preparation of a gel (for cutaneous use) by mixing the powder in the gel.
Transdermal sistem	10547000	Transdermal system	Assembly of components intended for transdermal delivery driven by external forces (e.g. electric current, chemical reaction,...). Transdermal patch is excluded.
Vajinal uygulama sistemi	10915000	Vaginal delivery system	Drug delivery system intended to be inserted in the vagina where it releases its contents over an extended period of time. Medicated sponge and medicated vaginal tampon are excluded.
